Foreword	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Symbols	3
5 General requirements of conformity	4
6 Technical information for probes	5
6.1 General.....	5
6.2 Probe data sheet.....	5
6.3 Probe test report.....	5
7 Test equipment	7
7.1 Electronic equipment.....	7
7.2 Test blocks and other equipment.....	7
8 Performance requirements for probes	15
8.1 Physical aspects.....	15
8.1.1 Procedure.....	15
8.1.2 Acceptance criterion.....	15
8.2 Pulse shape, amplitude and duration.....	15
8.2.1 Procedure.....	15
8.2.2 Acceptance criterion.....	16
8.3 Frequency spectrum and bandwidth.....	17
8.3.1 Procedure.....	17
8.3.2 Acceptance criteria.....	17
8.4 Pulse-echo sensitivity.....	17
8.4.1 Procedure.....	17
8.4.2 Acceptance criterion.....	18
8.5 Distance-amplitude curve.....	18
8.5.1 General.....	18
8.5.2 Procedure.....	18
8.5.3 Acceptance criterion.....	20
8.6 Beam parameters for immersion probes.....	20
8.6.1 General.....	20
8.6.2 Beam profile — Measurements performed directly on the beam.....	21
8.6.3 Beam profile — Measurements made using an automated scanning system.....	28
8.7 Beam parameters for straight-beam single-transducer contact probes.....	30
8.7.1 General.....	30
8.7.2 Beam divergence and side lobes.....	31
8.7.3 Squint angle and offset for straight-beam probes.....	32
8.7.4 Focal distance (near field length).....	33
8.7.5 Focal width.....	33
8.7.6 Length of the focal zone.....	34
8.8 Beam parameters for angle-beam single-transducer contact probes.....	34
8.8.1 General.....	34
8.8.2 Index point.....	34
8.8.3 Beam angle and beam divergence.....	35
8.8.4 Squint angle and offset for angle-beam probes.....	38
8.8.5 Focal distance (near field length).....	41
8.8.6 Focal width.....	42
8.8.7 Length of the focal zone.....	42
8.9 Beam parameters for straight-beam dual-transducer contact probes.....	43
8.9.1 General.....	43
8.9.2 Delay line delay path.....	43

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 135, *Non-destructive testing*, Subcommittee SC 3, *Ultrasonic testing*, in collaboration with the European Committee for Standardization (CEN) Technical Committee CEN/TC 138, *Non-destructive testing*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

A list of all parts in the ISO 22232 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
