Second edition
2021-10

Geotechnical investigation and testing — Sampling methods and groundwater measurements —

Part 1: Technical principles for the sampling of soil, rock and groundwater

Reconnaissance et essais géotechniques — Méthodes de prélèvement et mesurages piézométriques —

Partie 1: Principes techniques pour le prélèvement des sols, des roches et des eaux souterraines

Foreword	v
1 Scope	1
2 Normative references	1
3 Terms, definitions and abbreviated terms	2
3.1 Ground investigation methods.....	2
3.2 Drilling rigs and equipment.....	3
3.3 Sampling.....	4
3.4 Rock and soil properties.....	9
3.5 Abbreviated terms.....	9
4 Equipment	10
4.1 Requirements for the drilling rigs and equipment.....	10
4.2 Drilling parameters.....	10
4.3 Safety and special requirements.....	10
5 Procedures	11
5.1 General requirements for sampling.....	11
5.2 Selection of techniques and methods.....	11
5.3 Sampling categories for soil.....	11
5.3.1 General.....	11
5.3.2 Sample disturbance.....	12
5.3.3 Category A sampling.....	12
5.3.4 Category B sampling.....	13
5.3.5 Category C sampling.....	13
5.3.6 Category D sampling.....	13
5.3.7 Category E sampling.....	13
5.4 Sampling categories for rock.....	13
5.4.1 General.....	13
5.4.2 Sampling disturbance.....	14
5.4.3 Category A sampling.....	14
5.4.4 Category B sampling.....	14
5.4.5 Category C sampling.....	15
5.4.6 Category D sampling.....	15
5.4.7 Category E sampling.....	15
5.5 Sampling in trial pits, other excavations, headings and shafts.....	15
5.6 Requirements for ground investigation sites and points.....	15
5.7 Preliminary information needed before starting sampling.....	16
5.8 Backfilling and site reinstatement.....	16
6 Soil sampling methods	17
6.1 General.....	17
6.2 Sampling by drilling (continuous sampling).....	17
6.2.1 General.....	17
6.2.2 Sampling by rotary drilling.....	26
6.2.3 Sampling by use of hammer driving methods.....	28
6.2.4 Sampling by cable percussion drilling.....	28
6.2.5 Sampling by hollow stem auger drilling.....	28
6.2.6 Sampling by grab drilling.....	28
6.2.7 Soil sampling by small diameter drilling.....	29
6.2.8 Sampling by resonance drilling.....	29
6.3 Sampling using samplers.....	29
6.3.1 General.....	29
6.3.2 Sampling using the open-tube sampler and the piston sampler.....	33
6.3.3 Sampling using the standard penetration test sampler.....	38
6.3.4 Sampling by using the window sampler.....	38

6.3.5	Sampling using the windowless sampler	38
6.4	Block sampling	38
6.4.1	Sampling from trial pits	38
6.4.2	Sampling using large samplers	39
7	Rock sampling methods	39
7.1	General	39
7.2	Sampling by drilling	43
7.2.1	General	43
7.2.2	Sampling by rotary dry core drilling	43
7.2.3	Sampling by rotary core drilling	43
7.2.4	Sampling by wireline core drilling	44
7.2.5	Sampling of cuttings by rotary open hole drilling	44
7.3	Block sampling	44
8	Groundwater sampling methods for geotechnical purposes	44
8.1	General	44
8.2	Equipment	45
8.3	Techniques of groundwater sampling	45
8.3.1	General	45
8.3.2	Extraction by pumping	45
8.3.3	Extraction by water sampler	46
8.3.4	Extraction by vacuum bottles	46
9	Preservation, labelling, transport and storage of samples	46
9.1	General	46
9.2	Preservation of samples	46
9.3	Labelling of samples	47
9.4	Transport and storage of samples	48
9.4.1	General considerations	48
9.4.2	Sampling category A	48
9.4.3	Sampling category B to E	49
9.4.4	Transport of water samples	49
10	Report	50
10.1	Field report	50
10.1.1	General	50
10.1.2	Summary log	50
10.1.3	Drilling record	51
10.1.4	Sampling record	51
10.1.5	Record of identification and description of soil and rock	52
10.1.6	Backfilling record	53
10.1.7	Record of groundwater measurements during drilling and sampling	53
10.1.8	Daily record	53
10.2	Report of the results	53
Annex A (informative) Example of a form for the preliminary information on the intended sampling		55
Annex B (informative) Field reports		57
Annex C (informative) Drilling and sampling equipment for soil and rock		65
Annex D (informative) Examples of commonly used samplers and sample types		127
Annex E (informative) Vacuum bottles for groundwater sampling		130
Annex F (informative) Sealing and securing samples		132
Annex G (informative) Sampling of coarse soils by drilling		133
Annex H (informative) Sample quality		134
Bibliography		141

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 182, *Geotechnics*, in collaboration with the European Committee for Standardization (CEN) Technical Committee CEN/TC 341, *Geotechnical Investigation and Testing*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

This second edition cancels and replaces the first edition (ISO 22475-1:2006), which has been technically revised.

The main changes compared to the previous edition are as follows:

- clauses on groundwater measurement will be part of ISO 18674-4;
- new sampling categories for soils have been added;
- editorial updates have been made.

A list of all parts in the ISO 22475 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
