Seventh edition
2013-01-15

Rubber, vulcanized or thermoplastic — Determination of tension set under constant elongation, and of tension set, elongation and creep under constant tensile load

*Caoutchouc vulcanisé ou thermoplastique — Détermination de
la déformation rémanente sous allongement constant et de la
déformation rémanente, de l'allongement et du fluage sous charge
constante de traction*

Contents

	Page
Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	2
4 Apparatus	2
4.1 Constant-elongation measurements.....	2
4.2 Constant-load measurements.....	3
5 Calibration	4
6 Test pieces	4
6.1 Preparation.....	4
6.2 Test pieces for testing under constant elongation.....	4
6.3 Test pieces for testing under constant load.....	5
6.4 Marking.....	5
6.5 Number of test pieces.....	5
6.6 Time interval between forming and testing.....	5
6.7 Conditioning.....	6
7 Procedure	6
7.1 Testing under constant elongation.....	6
7.2 Testing under constant load.....	8
8 Expression of results	8
8.1 General.....	8
8.2 Constant elongation.....	8
8.3 Constant load.....	9
9 Test report	9
Annex A (normative) Calibration schedule	11
Bibliography	13

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 2285 was prepared by Technical Committee ISO/TC 45, *Rubber and rubber products*, Subcommittee SC 2, *Testing and analysis*.

This seventh edition cancels and replaces the sixth edition (ISO 2285:2007), which has been aligned with ISO 815-1 and an annex containing a calibration schedule has been added.
