Foreword	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Principle	2
4.1 Calculation of the linear density.....	2
4.2 Measurement of the diameter, lay length and braid pitch.....	2
4.3 Measurement of the elongation of the rope.....	2
4.4 Measurement of the breaking force.....	2
5 Apparatus	2
6 Sampling	3
6.1 Composition of the batch to be sampled.....	3
6.2 Sample size.....	3
6.3 Selection of samples.....	3
7 Test pieces for tensile testing and force-elongation measurements	3
7.1 Length.....	3
7.2 Number of test pieces.....	3
7.3 Taking the test pieces.....	3
8 Conditioning	4
9 Procedure	4
9.1 General.....	4
9.2 Initial measurements.....	4
9.3 Mounting the test piece on the testing machine.....	4
9.4 Measurement of diameter, lay length or braid pitch and gauge length.....	6
9.5 Bedding-in of the test piece.....	7
9.6 Measurement of the elongation of the rope.....	8
9.7 Measurement of the breaking force.....	8
10 Linear density	8
11 Expression of results	9
11.1 General.....	9
11.2 Linear density, ρ_1	9
11.3 Diameter, lay length or braid pitch.....	9
11.4 Elongation.....	9
11.5 Actual breaking force.....	10
12 Determination of water repellency	10
12.1 General.....	10
12.2 Principle.....	10
12.3 Test pieces.....	10
12.3.1 General.....	10
12.3.2 Whipping.....	10
12.3.3 Cutting the samples.....	10
12.3.4 Sealing.....	10
12.4 Procedure.....	11
12.4.1 First weighing.....	11
12.4.2 Second weighing.....	11
12.4.3 Third weighing.....	11
12.4.4 Drying the specimens.....	11
12.4.5 Fourth, fifth and sixth weighing.....	11
12.5 Results of tests.....	11

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 38, *Textiles*.

This fifth edition cancels and replaces the fourth edition (ISO 2307:2010), which has been technically revised. The main changes compared to the previous edition are as follows:

- inclusion of diameter in the scope, and describe methods to measure it;
- changes in test length;
- changes in test speed;
- inclusion of another method for determination of realization factor in [Annex B](#);
- addition of a sample of a test report ([Annex D](#)).

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
