1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Identification and record keeping	1
5 Standard laboratory conditions	2
5.1 Standard laboratory temperature.....	2
5.2 Standard laboratory humidity.....	2
5.3 Other conditions.....	2
6 Storage of samples and test pieces	2
7 Preparation of test pieces	3
7.1 Test piece thickness.....	3
7.2 Thickness adjustment.....	3
7.2.1 General.....	3
7.2.2 Techniques.....	3
7.2.3 Equipment for test piece preparation.....	4
7.3 Test piece cutters.....	5
7.3.1 General.....	5
7.3.2 Fixed-blade cutters.....	5
7.3.3 Replaceable-blade cutters.....	6
7.3.4 Rotary cutters.....	6
7.4 Maintenance of cutters.....	6
7.5 Preparation of test pieces by moulding.....	6
7.5.1 Test sheets.....	6
7.5.2 Test pieces.....	6
7.5.3 Thermoplastic materials.....	6
7.6 Preparation of unvulcanized test pieces.....	7
8 Conditioning	7
8.1 General.....	7
8.2 Conditioning times for subnormal or elevated temperatures.....	7
9 Measurement of the dimensions of test pieces	7
9.1 Method A — For dimensions less than 30 mm.....	7
9.2 Method B — For dimensions of 30 mm and up to and including 100 mm.....	8
9.3 Method C — For dimensions over 100 mm.....	8
9.4 Method D — Non-contact method.....	8
10 Conditions of test	9
10.1 Duration of test.....	9
10.2 Temperature and humidity.....	9
10.2.1 Standard laboratory temperature and humidity.....	9
10.2.2 Other test temperatures.....	9
11 Test chambers	10
11.1 General requirements for temperature-controlled chambers.....	10
11.2 Chambers operating at elevated temperatures.....	11
11.2.1 Chambers with gaseous heat-transfer media.....	11
11.2.2 Chambers with liquid heat-transfer media.....	11
11.2.3 Fluidized beds.....	11
11.3 Chambers operating at subnormal temperatures.....	11
11.3.1 Mechanically refrigerated units.....	11
11.3.2 Solid carbon dioxide units (direct-cooling type).....	11
11.3.3 Solid carbon dioxide units (indirect-cooling type).....	11

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

The committee responsible for this document is ISO/TC 45, *Rubber and rubber products*, Subcommittee SC 2, *Testing and analysis*.

This third edition cancels and replaces the second edition (ISO 23529:2010), which has been technically revised as follows.

- [Clause 2](#) and [Clause 3](#) have been added.
- Rubber solvent has been added as a textile-removing liquid ([7.2.2.1](#)).
- Description on preparation of unvulcanized test pieces has been added ([7.6](#)).
- [7.3.1](#) and [7.3.2](#) have been modified.
- Information on suitable callipers has been added (Note to [9.2](#)).
- The format of [Table A.1](#), [Table A.2](#) and [Table A.3](#) has been improved.
