Fourth edition
2017-07

Non-conductive coatings on non-magnetic electrically conductive base metals — Measurement of coating thickness — Amplitude-sensitive eddy-current method

Revêtements non conducteurs sur matériaux de base non magnétiques conducteurs de l'électricité — Mesurage de l'épaisseur de revêtement — Méthode par courants de Foucault sensible aux variations d'amplitude

Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Principle of measurement	2
5 Factors affecting measurement uncertainty	3
5.1 Basic influence of the coating thickness	3
5.2 Electrical properties of the base metal	3
5.3 Geometry: Base metal thickness	4
5.4 Geometry: Edge effects	4
5.5 Geometry: Surface curvature	4
5.6 Surface roughness	4
5.7 Cleanliness: Lift-off effect	5
5.8 Probe pressure	5
5.9 Probe tilt	5
5.10 Temperature effects	5
5.11 Intermediate coatings	6
5.12 External electromagnetic fields	6
6 Calibration and adjustment of the instrument	6
6.1 General	6
6.2 Thickness reference standards	6
6.3 Methods of adjustment	7
7 Measurement procedure and evaluation	8
7.1 General	8
7.2 Number of measurements and evaluation	8
8 Uncertainty of the results	8
8.1 General remarks	8
8.2 Uncertainty of the calibration of the instrument	9
8.3 Stochastic errors	10
8.4 Uncertainties caused by factors summarized in Clause 5	10
8.5 Combined uncertainty, expanded uncertainty and final result	11
9 Precision	11
9.1 General	11
9.2 Repeatability (<i>r</i>)	11
9.3 Reproducibility limit (<i>R</i>)	12
10 Test report	12
Annex A (informative) Eddy-current generation in a metallic conductor	14
Annex B (informative) Basics of the determination of the uncertainty of a measurement of the used measurement method corresponding to ISO/IEC Guide 98-3	18
Annex C (informative) Basic performance requirements for coating thickness gauges which are based on the amplitude-sensitive eddy-current method described in this document	20
Annex D (informative) Examples for the experimental estimation of factors affecting the measurement accuracy	22
Annex E (informative) Table of the student factor	27
Annex F (informative) Example of uncertainty estimation (see Clause 8)	28
Annex G (informative) Details on precision	30
Bibliography	34

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 107, *Metallic and other inorganic coatings*.

This fourth edition cancels and replaces the third edition (ISO 2360:2003), which has been technically revised.
