Third edition
2021-06

Passenger car tyres — Method for measuring relative wet grip performance — Loaded new tyres

*Pneumatiques pour voitures particulières — Méthode de mesure de
l'adhérence relative sur revêtement mouillé — Pneumatiques neufs en
charge*

Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Methods for measuring wet grip index	3
5 General test conditions	3
5.1 Track characteristics.....	3
5.2 Wetting conditions.....	4
5.3 Atmospheric conditions.....	4
6 Measurement of tyre wet grip index on a commercialized vehicle	5
6.1 Principle.....	5
6.2 Equipment.....	5
6.2.1 Vehicle.....	5
6.2.2 Measuring equipment.....	5
6.3 Conditioning of the test track.....	6
6.4 Test speed measurement requirements.....	6
6.5 Tyres, rims and fitment on vehicle.....	6
6.5.1 Tyre preparation and break-in.....	6
6.5.2 Tyre load.....	6
6.5.3 Tyre inflation pressure.....	6
6.6 Procedure.....	7
6.6.1 Test run.....	7
6.6.2 Processing of measurement results.....	7
6.6.3 Braking test cycle and braking tests.....	8
6.6.4 Validation of results.....	9
6.6.5 Calculation of the adjusted braking force coefficients of the reference tyre.....	9
6.6.6 Calculation of the relative wet grip performance index of the tyre.....	10
7 Measurement of tyre wet grip index on a trailer or a tyre test vehicle	11
7.1 Principle.....	11
7.2 Test apparatus.....	11
7.2.1 General.....	11
7.2.2 Apparatus with a self-watering system.....	12
7.2.3 Instrumentation.....	12
7.3 Selection and preparation of test tyres.....	13
7.4 Preparation of test track and apparatus.....	13
7.4.1 Conditioning of the track.....	13
7.4.2 Towed trailer.....	14
7.4.3 Tyre test vehicle.....	14
7.4.4 Instrumentation and equipment.....	14
7.5 General test conditions.....	14
7.6 Procedure.....	14
7.6.1 Test run.....	14
7.6.2 Processing of measurement results.....	14
7.6.3 Braking test cycle and braking tests.....	15
7.6.4 Validation of results.....	16
7.6.5 Calculation of the adjusted peak braking force coefficients of the reference tyre.....	16
7.6.6 Calculation of the relative wet grip performance index of the tyre.....	17
Annex A (informative) Example test report of wet grip index	19
Bibliography	22

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing this document is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 31, *Tyre, rims and valves*.

This third edition cancels and replaces the second edition (ISO 23671:2015), which has been technically revised.

The main changes compared to the previous edition are as follows:

- the method accuracy and reproducibility has been improved by updating the formulae and coefficients for wet grip index calculation;
- the method of track validation has been revised to be done only with 16 in SRTT instead of with BPN or 14 in SRTT,
- the wet grip performance measurement using a control tyre in case of vehicle method has been withdrawn.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
