Third edition
2009-07-15

Gas welding equipment — Pressure regulators and pressure regulators with flow-metering devices for gas cylinders used in welding, cutting and allied processes up to 300 bar (30 MPa)

Matériel de soudage aux gaz — Détendeurs et détendeurs débitmètres intégrés pour bouteilles de gaz utilisés pour le soudage, le coupage et les techniques connexes jusqu'à 300 bar (30 MPa)

Reference number
ISO 2503:2009(E)

Foreword	iv
1 Scope	1
2 Normative references	2
3 Terms and definitions	2
4 Symbols and abbreviated terms	4
5 Design requirements	4
5.1 Materials	4
5.2 Design and construction	4
6 Physical performance and operating characteristics.....	7
6.1 Pressures	7
6.2 Flow rates for pressure regulators without flow-metering devices	7
6.3 Equipment classes for pressure regulators without flow-metering devices	7
6.4 Pressure-relief valve	9
6.5 Operating-temperature range.....	9
6.6 Performance and operating characteristics	9
7 Marking	11
7.1 Pressure regulators without flow-metering devices.....	11
7.2 Pressure regulators with flow-metering devices	11
8 Instructions for use	12
9 Type-test procedure	12
9.1 General	12
9.2 Test samples and necessary documents	13
9.3 Test conditions	13
9.4 Units.....	13
9.5 Test for performance and operating characteristics of pressure regulators without flow-metering devices	14
9.6 Test for performance and operating characteristics of pressure regulator with flow-metering devices	17
9.7 Tests for mechanical resistance of pressure regulators or pressure regulator with a flow-metering device	19
9.8 Test for durability of markings.....	23
Annex A (informative) Pressure regulators.....	24
Annex B (informative) Operating principles of pressure regulators with flow-metering devices	28
Bibliography.....	30

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 2503 was prepared by Technical Committee ISO/TC 44, *Welding and allied processes*, Subcommittee SC 8, *Equipment for gas welding, cutting and allied processes*.

This third edition cancels and replaces the second edition (ISO 2503:1998), and also ISO 7292:1997, which have been technically revised.

Requests for official interpretations of any aspect of this International Standard should be directed to the Secretariat of ISO/TC 44/SC 8 via your national standards body. A complete listing of these bodies can be found at www.iso.org.
