Foreword.....	iv
<b>1 Scope .....</b>	<b>1</b>
<b>2 Normative references .....</b>	<b>1</b>
<b>3 Symbols and abbreviated terms .....</b>	<b>1</b>
<b>4 Principle.....</b>	<b>3</b>
<b>5 Apparatus .....</b>	<b>3</b>
<b>6 Specimens .....</b>	<b>3</b>
6.1 Number of specimens .....	3
6.2 Conditioning.....	4
6.3 Manufacture of adhesive joint specimens .....	4
6.4 Measurement of specimen dimensions.....	6
6.4.1 DCB substrates .....	6
6.4.2 TDCB substrates.....	6
6.4.3 DCB and TDCB substrates .....	6
6.5 Preparation of specimens.....	7
<b>7 Procedure .....</b>	<b>7</b>
7.1 Test set-up and data recording .....	7
7.2 Initial loading (the precracking stage).....	7
7.3 Re-loading: Testing from the mode I precrack .....	8
7.4 Measurement of machine compliance.....	9
<b>8 Data analysis .....</b>	<b>9</b>
8.1 Determination of the raw data from the load-displacement trace .....	9
8.1.1 General.....	9
8.1.2 Initiation values.....	9
8.1.3 Propagation values.....	10
8.2 Determination of $G_{IC}$ .....	10
8.2.1 General.....	10
8.2.2 Double cantilever beam (DCB) .....	10
8.2.3 Tapered double cantilever beam (TDCB) .....	12
<b>9 Test report .....</b>	<b>13</b>
9.1 Test report for the DCB test.....	13
9.2 Test report for the TDCB test .....	14
<b>Annex A (informative) Measurement of test system compliance.....</b>	<b>16</b>
<b>Annex B (normative) Procedure to follow when unstable or “stick-slip” crack growth is observed during the fracture test.....</b>	<b>18</b>
<b>Annex C (normative) Procedure to detect the occurrence of plastic deformation during a DCB or TDCB adhesive joint test .....</b>	<b>19</b>
<b>Annex D (informative) Summary of background theory.....</b>	<b>20</b>
<b>Bibliography .....</b>	<b>24</b>

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 25217 was prepared by Technical Committee ISO/TC 61, *Plastics*, Subcommittee SC 2, *Mechanical properties*.
