## Contents

	Page
Foreword .....	v
<b>1 Scope .....</b>	<b>1</b>
<b>2 Normative references .....</b>	<b>1</b>
<b>3 Terms and definitions .....</b>	<b>2</b>
<b>4 Accuracy of measuring equipment and instruments .....</b>	<b>2</b>
4.1 Torque .....	2
4.2 Engine speed (rotational frequency) .....	2
4.3 Fuel flow .....	2
4.4 Fuel temperature .....	2
4.5 Air temperature .....	2
4.6 Barometric pressure .....	2
4.7 Back pressure in exhaust system .....	3
4.8 Depression in inlet system .....	3
4.9 Absolute pressure in inlet duct .....	3
<b>5 Tests .....</b>	<b>5</b>
5.1 Auxiliaries .....	5
5.1.1 Auxiliaries to be fitted .....	5
5.1.2 Auxiliaries to be removed .....	6
5.1.3 Compression-ignition engine starting auxiliaries .....	6
5.2 Setting conditions .....	6
5.3 Test conditions .....	6
5.4 Test procedure .....	8
5.5 Data to be recorded .....	8
<b>6 Power correction factors .....</b>	<b>8</b>
6.1 Definition of factor $\alpha$ for power correction .....	8
6.2 Atmospheric conditions .....	9
6.2.1 Reference atmospheric conditions .....	9
6.2.2 Test atmospheric conditions .....	9
6.3 Determination of power correction factors .....	9
6.3.1 Naturally aspirated and pressure-charged spark-ignition engines — Factor $\alpha_a$ .....	10
6.3.2 Compression-ignition engines — Factor $\alpha_c$ .....	10
6.3.3 Turbocharged engine with a system compensating the ambient conditions .....	12
6.3.4 Other types of engine .....	12
<b>7 Measurement of and correction for smoke value for compression-ignition engines .....</b>	<b>12</b>
7.1 Correction factor for light absorption coefficient of smoke .....	12
7.2 Determination of correction factor for light absorption coefficient of smoke .....	12
7.3 Limits of application .....	12
<b>8 Test report .....</b>	<b>13</b>
8.1 Compression-ignition engines — Essential characteristics .....	13
8.1.1 Description of engine .....	13
8.1.2 Cooling system .....	13
8.1.3 Temperatures specified by the manufacturer .....	14
8.1.4 Pressure charger (with/without) (delete where inapplicable) .....	14
8.1.5 Inlet system .....	15
8.1.6 Additional smoke control devices (if any, and if not covered by another heading) .....	15
8.1.7 Fuel feed system .....	15
8.1.8 Valve timing .....	16
8.1.9 Exhaust system .....	16
8.1.10 Lubrication system .....	16
8.1.11 Electrical equipment .....	17
8.1.12 Other engine-driven equipment .....	17

8.2	Spark-ignition engines — Essential characteristics .....	17
8.2.1	Description of engine .....	17
8.2.2	Cooling system .....	17
8.2.3	Temperature specified by the manufacturer .....	18
8.2.4	Pressure charger (with/without) (delete where inapplicable) .....	18
8.2.5	Inlet system .....	19
8.2.6	Additional anti-pollution devices (if any, and if not covered by another heading) .....	19
8.2.7	Fuel feed system .....	19
8.2.8	Valve timing .....	20
8.2.9	Ignition system .....	20
8.2.10	Exhaust system .....	21
8.2.11	Lubrication system .....	21
8.2.12	Electrical equipment .....	21
8.2.13	Other auxiliaries fitted to engine .....	21
8.3	Test conditions for measuring engine gross power .....	21
8.4	Statement of results as function of engine speed .....	24
<b>9</b>	<b>Verification of engine performance .....</b>	<b>25</b>
9.1	Designation .....	25
9.2	Notation .....	25
9.2.1	Declared gross power and corresponding engine speed (range) .....	25
9.2.2	Declared gross torque and corresponding engine speed (range) .....	25
9.2.3	Declared specific gross fuel consumption and corresponding engine speed (range) .....	25
9.3	Tolerances – Declared values .....	25
9.3.1	Power .....	25
9.3.2	Torque .....	26
9.3.3	Specific fuel consumption .....	26
9.3.4	Numerical tolerances .....	27
	<b>Bibliography .....</b>	<b>31</b>

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see [www.iso.org/patents](http://www.iso.org/patents)).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html).

This document was prepared by Technical Committee ISO/TC 22, *Road vehicles*, Subcommittee SC 34, *Propulsion, powertrain and powertrain fluids*.

This third edition cancels and replaces the second edition (ISO 2534:1998), which has been technically revised. The main changes compared to the previous edition are as follows:

- a requirement for exhaust particulate filter restriction has been added;
- a requirement for engine cooling active thermal management system settings has been added;
- a power correction factor for turbocharged engines with a system compensating the ambient conditions has been added.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at [www.iso.org/members.html](http://www.iso.org/members.html).
