## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 26868 was prepared by the Consultative Committee for Space Data Systems (CCSDS) (as CCSDS 122.0-B-1, November 2005, incorporating the Technical Corrigenda CCSDS 122.0-B-1 Cor.1, July 2006, and CCSDS 122.0-B-1 Cor.2, July 2008) and was adopted (without modifications except those stated in Clause 2 of this International Standard) by Technical Committee ISO/TC 20, *Aircraft and space vehicles*, Subcommittee SC 13, *Space data and information transfer systems*.

This corrected version of ISO 26868:2009 also incorporates the corrections of Technical Corrigendum CCSDS 122.0-B-1 Cor.3, September 2011. Corrections are identified by a bar in the margin and the designation "Cor.3"; a summary of corrections is given on page v of the enclosed CCSDS publication. In addition, the information in Clause 2 of this International Standard has been updated.
