

## ISO 2738

### **Sintered metal materials, excluding hardmetals — Permeable sintered metal materials — Determination of density, oil content and open porosity**

*Matériaux métalliques frittés, à l'exclusion des métaux-durs —  
Matériaux métalliques frittés perméables — Détermination de la  
masse volumique, de la teneur en huile et de la porosité ouverte*

**Fourth edition  
2026-01**

<b>Foreword</b> .....	<b>iv</b>
<b>1 Scope</b> .....	<b>1</b>
<b>2 Normative references</b> .....	<b>1</b>
<b>3 Terms and definitions</b> .....	<b>1</b>
<b>4 Symbols and designations</b> .....	<b>2</b>
<b>5 Test procedures</b> .....	<b>2</b>
<b>6 Equipment</b> .....	<b>3</b>
<b>7 Test piece</b> .....	<b>3</b>
<b>8 Test procedures</b> .....	<b>4</b>
8.1 Determination of the initial mass of the test piece.....	4
8.2 Removal of oil from the test piece by solvent extraction.....	4
8.3 Determination of the mass of the dried test piece.....	4
8.4 Impregnation with oil and surface coating.....	4
8.4.1 Full impregnation (for determination of the open porosity).....	4
8.4.2 Partial impregnation (suitable for determination of the volume).....	5
8.4.3 Surface coating methods (suitable for determination of the volume).....	5
8.5 Determination of the mass of the fully impregnated test piece.....	5
8.6 Determination of the volume of the test piece.....	5
<b>9 Expression of results</b> .....	<b>9</b>
9.1 Density.....	9
9.2 Oil content.....	9
9.3 Open porosity.....	9
<b>10 Precision of dry density determination</b> .....	<b>9</b>
<b>11 Test report</b> .....	<b>11</b>
<b>Bibliography</b> .....	<b>12</b>

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at [www.iso.org/patents](http://www.iso.org/patents). ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html).

This document was prepared by Technical Committee ISO/TC 119, *Powder metallurgy*, Subcommittee SC 3, *Sampling and testing methods for sintered metal materials (excluding hardmetals)*, in collaboration with the European Committee for Standardization (CEN), in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

This fourth edition cancels and replaces the third edition (ISO 2738:1999), which has been technically revised.

The main change is as follows:

- [Clause 10](#) "Precision" revised.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at [www.iso.org/members.html](http://www.iso.org/members.html).
