Foreword	iv
1 Scope	1
2 Normative references	1
3 Symbols	2
4 Recommended pipe cleaning levels	2
4.1 Pipe cleaning levels during/after prefabrication	2
4.2 Surface treatment	3
4.3 Storage of prefabricated pipes and fittings	3
5 Level of cleanliness	3
6 Assembly and installation of pipe system	3
7 Blow-through/pull-through of the system	3
8 Description of coupling	4
8.1 Design phase	4
8.2 Other considerations	4
9 Leakage test	4
10 Filling with oil	5
11 Shock testing/pressure testing	5
12 Flushing of yard-installed pipe system	5
12.1 Connection	5
12.2 Special pump units	5
12.3 Flushing filters	5
12.4 Flushing oil	9
12.5 Flushing times	11
12.6 Methods for checking the cleanliness level	12
12.7 Leakage testing	13
13 Start-up of system	13
Annex A (informative) Example of particle counting	14
Bibliography	15

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 28521 was prepared by Technical Committee ISO/TC 8, *Ships and marine technology*, Subcommittee SC 3, *Piping and machinery*.
