Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Test conditions	2
4.1 Valve selection	2
4.2 Testing criteria and selection of valve design	2
4.2.1 General	2
4.2.2 Representative valve design selection	3
4.2.3 Selection and qualification of sealing elements	3
4.3 Requirements for test valve, direction for installation and conditions	3
4.4 Preparation for low temperature test	3
4.4.1 General	3
4.4.2 Valve tests	3
4.4.3 Test equipment	3
5 Low temperature testing requirements	4
5.1 Safety provisions	4
5.2 Cooling of the valve	4
5.3 Test gas	4
5.4 Equipment	4
5.4.1 General	4
5.4.2 Test equipment	6
5.4.3 Instruments calibration	6
6 Information to be supplied by the purchaser	6
Annex A (normative) Test procedure for type testing of valves at low temperature	7
Annex B (informative) Information to be supplied by the purchaser	13
Annex C (informative) Low-temperature type test record	14
Bibliography	18

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the WTO principles in the Technical Barriers to Trade (TBT) see the following URL: [Foreword - Supplementary information](#)

The committee responsible for this document is Technical Committee ISO/TC 153, *Valves*, Subcommittee SC 1, *Design, manufacture, marking and testing*.

ISO 28921 consists of the following parts, under the general title *Industrial valves — Isolating valves for low-temperature applications*:

- *Part 1: Design, manufacturing and production testing*
- *Part 2: Type testing*
