Fourth edition
2013-04-01

Cigarettes and filter rods — Determination of nominal diameter — Method using a non-contact optical measuring apparatus

*Cigarettes et bâtonnets-filtres — Détermination du diamètre nominal —
Méthode utilisant un instrument de mesure optique sans contact*

Contents

	Page
Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Principle	2
5 Apparatus	2
6 Sampling	3
7 Procedure	3
7.1 Preparation of test pieces.....	3
7.2 Adjustment and calibration.....	4
7.3 Measurement.....	4
8 Expression of results	4
9 Repeatability and reproducibility	5
10 Test report	5
Annex A (normative) Calibration standards	7
Annex B (informative) Measurement principle and required number of scans	8
Annex C (informative) Information on possible source of measurement error	10
Annex D (informative) Non-contact measurement techniques	12
Annex E (informative) Alternative measurement techniques for the determination of nominal diameter of cigarettes and filter rods	15
Annex F (informative) Protocol for ISO/TC 126/SC 1/WG 2 interlaboratory diameter measurement uncertainty study	17

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 2971 was prepared by Technical Committee ISO/TC 126, *Tobacco and tobacco products*, Subcommittee SC 1, *Physical and dimensional tests*.

This fourth edition cancels and replaces the third edition (ISO 2971:1998), which has been technically revised.
