

ISO 29862

**Self adhesive tapes —
Determination of peel adhesion
properties**

*Rubans auto-adhésifs — Détermination des caractéristiques de la
force de pelage (pouvoir adhésif linéaire)*

**Third edition
2024-12**

Foreword	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Significance and use	2
5 Method 1 — Self adhesive tapes — Measurement of peel adhesion from stainless steel at an angle of 180°	3
5.1 Principle.....	3
5.2 Materials.....	3
5.3 Apparatus.....	4
5.3.1 Test piece cutter.....	4
5.3.2 Tensile testing machine.....	4
5.3.3 Stainless steel panels.....	4
5.3.4 Roller mechanically or hand operated.....	4
5.3.5 Light hand roller.....	4
5.4 Test samples and test pieces.....	4
5.5 Procedure.....	5
5.5.1 Standard test conditions.....	5
5.5.2 Preparation of the panel.....	5
5.5.3 Peel adhesion.....	5
5.6 Expression of results.....	6
5.7 Test report.....	6
6 Method 2 — Self adhesive tapes — Measurement of peel adhesion from its own backing at an angle of 180°	6
6.1 Principle.....	6
6.2 Apparatus.....	7
6.2.1 Test piece cutter.....	7
6.2.2 Tensile testing machine.....	7
6.2.3 Suitable panels.....	7
6.2.4 Roller mechanically or hand operated.....	7
6.3 Test samples and test pieces.....	7
6.4 Procedure.....	7
6.4.1 Standard test conditions.....	7
6.4.2 Preparation.....	7
6.5 Expression of results.....	7
6.6 Test report.....	7
7 Method 3 — Self adhesive tapes — Measurement of peel adhesion of double-sided and transfer tapes at an angle of 180°	8
7.1 Principle.....	8
7.2 Materials.....	8
7.3 Apparatus.....	8
7.4 Test samples and test pieces.....	8
7.5 Procedure.....	8
7.5.1 Standard test conditions.....	8
7.5.2 Preparation of the panel.....	8
7.5.3 Procedure for open side of double-sided or adhesive transfer tape.....	8
7.5.4 Procedure for closed side of double-sided or adhesive transfer tape.....	9
7.6 Expression of results.....	9
7.7 Test report.....	9
8 Method 4 — Self adhesive tapes — Measurement of adhesion of the liner to an adhesive tape at an angle of 180°	9
8.1 Principle.....	9

8.2	Materials	9
8.3	Apparatus.....	9
8.4	Test samples and test pieces	9
8.5	Procedure.....	10
	8.5.1 Double-sided tapes.....	10
	8.5.2 Single sided tape.....	10
8.6	Expression of results.....	10
8.7	Test report.....	10
Annex A (normative) Self adhesive tapes — Measurement of peel adhesion from a surface at low temperature.....		11
Annex B (normative) Self adhesive tapes — Measurement of peel adhesion from a surface at an angle of 90°.....		12
Bibliography.....		14

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 61, *Plastics*, Subcommittee SC 11, *Products*, in collaboration with the European Committee for Standardization (CEN) Technical Committee CEN/TC 193, *Adhesives*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

This third edition cancels and replaces the second edition (ISO 29862:2018), which has been technically revised.

The main changes are as follows:

- the normative references in [Clause 2](#) have been updated;
- definitions have been added in [Clause 3](#) for “test piece”, “test sample”, “backing” and “carrier”;
- [Clause 4](#) has been modified to improve clarity and precision;
- the list of solvents in [5.2.2](#) has been revised;
- the description of the cutting device in [5.3.1](#) has been amended;
- the description of the procedure for preparing the peel test specimens has been revised, taking into account occupational safety and practicability;
- the light hand roller was added in [5.3.5](#);
- conditioning time of 16 h was added in [5.4.1](#);
- inconsistencies have been removed in [Clause 8](#);
- the text has been editorially revised to comply with the most recent principles and rules for the structure and drafting.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
