1998-11-15

Watch-cases and accessories — Gold alloy coverings —

Part 1: General requirements

*Boîtes de montres et leurs accessoires — Revêtements d'alliage d'or —
Partie 1: Exigences générales*

Reference number
ISO 3160-1:1998(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. International Standard requires approval by at least 75 % of the national bodies casting a vote.

International Standard ISO 3160-1 was prepared by Technical Committee ISO/TC 114, *Horology*, Subcommittee SC 6, *Precious metal coverings*.

This third edition cancels and replaces the second edition (ISO 3160-1:1995), which has been technically revised.

ISO 3160 consists of the following parts, under the general title *Watch-cases and accessories — Gold alloy coverings*:

- *Part 1: General requirements*
- *Part 2: Determination of fineness, thickness, corrosion resistance and adhesion*
- *Part 3: Abrasion resistance tests of a type of coating on standard gauges*
