

Second edition
2021-03

Extenders — Specifications and methods of test —

Part 19: Precipitated silica

*Matières de charge — Spécifications et méthodes d'essai —
Partie 19: Silice précipitée*

Contents

	Page
Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Requirements and test methods	2
5 Sampling	2
6 Determination of silica content	2
6.1 Principle	2
6.2 Reagents	3
6.3 Apparatus	3
6.4 Procedure	4
6.4.1 Number of determinations	4
6.4.2 Test portion	4
6.4.3 Determination	4
6.4.4 Determination of the total loss on ignition	4
6.5 Expression of results	5
6.6 Precision	5
6.6.1 Repeatability, <i>r</i>	5
6.6.2 Reproducibility, <i>R</i>	5
7 Determination of carbon content	5
7.1 Principle	5
7.2 Reagents and materials	6
7.3 Apparatus	6
7.4 Procedure	6
7.4.1 Preparation of apparatus	6
7.4.2 Calibration	7
7.4.3 Determination	7
7.5 Expression of results	7
7.6 Precision	7
8 Determination of residue on sieve	7
8.1 Principle	7
8.2 Materials	8
8.3 Apparatus	8
8.4 Procedure	8
8.4.1 Number of determinations	8
8.4.2 Test portion	8
8.4.3 Determination	8
8.5 Expression of results	9
8.6 Precision	9
9 Test report	9
Bibliography	10

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 256, *Pigments, dyestuff and extenders*, in collaboration with the European Committee for Standardization (CEN) Technical Committee CEN/TC 298, *Pigments and extenders*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

This second edition cancels and replaces the first edition (ISO 3262-19:2000), which has been technically revised.

The main changes compared to the previous edition are as follows:

- the main title has been changed from "Extenders for paints" to "Extenders";
- in [Table 1](#), carbon content has been revised and organic surface has been refined;
- in [6.3.8](#), magnesium perchlorate has been changed to an example for a desiccant;
- in [7.2.3](#), suitable examples for carbon steel have been added;
- the text has been editorially revised and the normative references have been updated.

A list of all parts in the ISO 3262 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
