Foreword.....	iv
1 Scope	1
2 Normative references	1
3 Classes of tolerances	1
4 Measurement of dimensions	2
4.1 General.....	2
4.2 Test instruments	2
5 Flatness tolerance	2
6 Parallelism tolerance	3
6.1 Sandwich structure (rubber between two metal plates)	3
6.2 Extruded-product cut section (e.g. lathe-cut rings)	4
7 Perpendicularity tolerance.....	5
8 Coaxiality tolerance	5
8.1 Moulded products.....	5
8.2 Mandrel-supported extruded products.....	7
8.3 Rotating parts.....	7
9 Positional tolerances.....	8

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 3302-2 was prepared by Technical Committee ISO/TC 45, *Rubber and rubber products*, Subcommittee SC 4, *Products (other than hoses)*.

This second edition cancels and replaces the first edition (ISO 3302-2:1998), of which it constitutes a minor revision, the main purpose of which was to correct Figure 5, revise Subclause 4.2.1 and update the normative references.

ISO 3302 consists of the following parts, under the general title *Rubber — Tolerances for products*:

- *Part 1: Dimensional tolerances*
- *Part 2: Geometrical tolerances*
