Ball screws —

Part 5:

Static and dynamic axial load ratings and operational life

Vis à billes —

*Partie 5: Charges axiales statiques et dynamiques de base et durée
de vie*

Reference number
ISO 3408-5:2006(E)

Foreword.....	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions.....	1
4 Symbols and subscripts	2
4.1 Symbols	2
4.2 Subscripts	3
5 Basic axial load ratings	4
5.1 Basic static axial load rating, C_{0a}	4
5.2 Basic dynamic axial load rating, C_a	4
6 Modified axial load ratings.....	5
6.1 Modified static axial load rating, C_{0am}	5
6.1.1 General equation.....	5
6.1.2 Correction for surface hardness, f_{h0}	5
6.1.3 Correction for accuracy, f_{ac}	6
6.2 Modified dynamic axial load rating, C_{am}	6
6.2.1 General equation.....	6
6.2.2 Correction for surface hardness, f_h	6
6.2.3 Correction for accuracy, f_{ac}	6
6.2.4 Influence of material melting process, f_m	6
7 Life.....	7
7.1 Equivalent rotational speed and equivalent axial load	7
7.1.1 General.....	7
7.1.2 Ball screw with backlash between ball nut and screw shaft.....	7
7.1.3 Ball screw with preloaded ball nuts on screw shaft	10
7.2 Nominal life, L or L_h	12
7.2.1 Ball screw with backlash between ball nut and screw shaft.....	12
7.2.2 Ball screw with preloaded ball nuts on screw shaft	13
7.2.3 Resulting life, L_r	13
7.2.4 Nominal life, L_{ar} or L_{har} , with reliability factor, f_{ar} (see Table 3).....	13
7.3 Modified life, L_m or L_{hm}	14
7.3.1 Ball screw with backlash between ball nut and screw shaft.....	14
7.3.2 Ball screw with preloaded ball nuts on screw shaft	14
7.3.3 Modified resulting life, L_{mr}	14
7.3.4 Modified life, L_{mar} or L_{hmar} , with reliability factor, f_{ar} (see Table 3).....	14

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 3408-5 was prepared by Technical Committee ISO/TC 39, *Machine tools*.

ISO 3408 consists of the following parts, under the general title *Ball screws*:

- *Part 1: Vocabulary and designation*
- *Part 2: Nominal diameters and nominal leads — Metric series*
- *Part 3: Acceptance conditions and acceptance tests*
- *Part 4: Static axial rigidity*
- *Part 5: Static and dynamic axial load ratings and operational life*
