## **Crude petroleum and liquid petroleum products — Laboratory determination of density — Hydrometer method**

*Pétrole brut et produits pétroliers liquides — Détermination en laboratoire de la masse volumique — Méthode à l'aréomètre*

Reference number  
ISO 3675:1998(E)

## **Foreword**

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 3675 was prepared by Technical Committee ISO/TC 28, *Petroleum products and lubricants*, subcommittee SC 3, *Static petroleum measurement*.

This third edition cancels and replaces the second edition (ISO 3675:1993), of which it constitutes a Technical revision.

Annex A forms an integral part of this International Standard. Annex B is for information only.
