Third edition
2020-07

Measurement of fluid flow in closed conduits — Velocity area method using Pitot static tubes

Mesurage du débit des fluides dans les conduites fermées — Méthode d'exploration du champ des vitesses au moyen de tubes de Pitot doubles

Reference number

| Foreword | v |
| 1 Scope | 1 |
| 2 Normative references | 1 |
| 3 Terms, definitions and symbols | 1 |
| 3.1 Terms and definitions..... | 1 |
| 3.2 Symbols..... | 2 |
| 4 Principle | 3 |
| 4.1 General principle..... | 3 |
| 4.1.1 Graphical integration of the velocity area (see Clause 9)..... | 4 |
| 4.1.2 Numerical integration of the velocity area (see Clause 10)..... | 4 |
| 4.1.3 Arithmetical methods (see Clause 11)..... | 4 |
| 4.2 Measurement of the measuring cross-section..... | 4 |
| 4.2.1 Circular cross-sections..... | 4 |
| 4.2.2 Rectangular cross-sections..... | 4 |
| 4.3 Measurement of local velocities..... | 5 |
| 4.3.1 Method of exploring traverse section..... | 5 |
| 4.3.2 Reference measurement..... | 5 |
| 4.3.3 Checking of velocity distribution..... | 5 |
| 4.4 Location and number of measuring points in the cross-section..... | 6 |
| 4.4.1 General requirements..... | 6 |
| 4.4.2 Circular cross-sections..... | 6 |
| 4.4.3 Rectangular cross-sections..... | 6 |
| 5 Design of Pitot tubes | 7 |
| 5.1 General description..... | 7 |
| 5.2 Criteria to be fulfilled by the Pitot tube..... | 7 |
| 6 Requirements for use of Pitot tubes | 8 |
| 6.1 Selection of the measuring cross-section..... | 8 |
| 6.1.1 Location of the measuring cross-section (of selection)..... | 8 |
| 6.1.2 Avoidance of asymmetry, swirl and turbulences..... | 8 |
| 6.1.3 Maximum flow deviation..... | 8 |
| 6.1.4 Preliminary traverse tests..... | 9 |
| 6.2 Devices for improving flow conditions..... | 9 |
| 6.2.1 Anti-swirl device..... | 9 |
| 6.2.2 Profile developer..... | 9 |
| 6.2.3 Positioning/Location of devices..... | 9 |
| 6.2.4 Provisional guiding installation..... | 9 |
| 6.3 Limits of use..... | 9 |
| 6.3.1 Nature of the fluid..... | 9 |
| 6.3.2 Range of velocities..... | 9 |
| 6.3.3 Nature of the flow..... | 10 |
| 6.3.4 Dimensional limitations..... | 10 |
| 6.3.5 Influence of turbulence..... | 10 |
| 6.4 Performance of measurements..... | 10 |
| 6.4.1 Measurement of differential pressure..... | 10 |
| 6.4.2 Differential pressure fluctuations..... | 10 |
| 6.4.3 Determination of fluid density..... | 11 |
| 6.5 Inspection and maintenance of the Pitot tube..... | 11 |
| 7 Positioning of Pitot tube | 11 |
| 8 Velocity computation | 11 |
| 8.1 Verification of conditions for a measurement..... | 11 |
| 8.2 Formulae for velocity computation..... | 12 |

|---|--|-----------|
| 9 | Determination of the discharge velocity by graphical integration of the velocity area | 13 |
| 9.1 | Circular cross-section..... | 14 |
| 9.2 | Rectangular cross-sections..... | 15 |
| 10 | Determination of the discharge velocity by numerical integration of the velocity area | 17 |
| 10.1 | Circular cross-sections..... | 17 |
| 10.2 | Rectangular cross-sections..... | 19 |
| 11 | Determination of the discharge velocity by arithmetic methods | 19 |
| 11.1 | “Log-linear” method..... | 20 |
| 11.1.1 | Circular cross-sections..... | 20 |
| 11.1.2 | Rectangular cross-sections..... | 20 |
| 11.2 | Log-Chebyshev method..... | 22 |
| 11.2.1 | Circular cross-sections..... | 22 |
| 11.2.2 | Rectangular cross-sections..... | 22 |
| 12 | Corrections of local velocity measurements | 23 |
| 12.1 | Correction for stem blockage..... | 23 |
| 12.1.1 | Case where the correction can be neglected..... | 23 |
| 12.1.2 | Estimation of the correction of local velocity measurement..... | 23 |
| 12.1.3 | Estimation of the overall correction of the flow-rate value (application to arithmetic methods)..... | 25 |
| 12.2 | Correction for transverse velocity gradient..... | 25 |
| 12.2.1 | Correction for measuring point position..... | 26 |
| 12.2.2 | Overall correction of flow rate..... | 26 |
| 12.3 | Correction for turbulence..... | 27 |
| 12.4 | Correction for head loss..... | 28 |
| 13 | Errors | 28 |
| 13.1 | Definition of the error..... | 28 |
| 13.2 | Errors in the estimation of the local velocity..... | 28 |
| 13.2.1 | Random errors..... | 28 |
| 13.2.2 | Systematic errors..... | 29 |
| 13.3 | Errors in the estimation of flow rate..... | 30 |
| 13.3.1 | Random errors..... | 30 |
| 13.3.2 | Systematic errors..... | 30 |
| 13.4 | Definition of the standard deviation..... | 31 |
| 13.5 | Definition of the tolerance..... | 31 |
| 13.6 | Calculation of standard deviation..... | 32 |
| 13.6.1 | Standard deviation on local velocity measurement..... | 32 |
| 13.6.2 | Standard deviation on flow-rate measurement..... | 33 |
| Annex A (normative) Pitot tubes | | 34 |
| Annex B (normative) Correction to the measuring position of Pitot tubes used in a transverse velocity gradient | | 40 |
| Annex C (normative) Study concerning turbulence correction | | 42 |
| Annex D (normative) Damping of pressure gauges | | 45 |
| Annex E (normative) Measurements with a Pitot tube in a compressible fluid | | 47 |
| Annex F (normative) Determination of coefficient m for extrapolation near the wall | | 51 |
| Annex G (informative) Example of calculation of the uncertainty on the flow-rate measurement by means of Pitot tubes | | 52 |
| Bibliography | | 55 |

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 30, *Measurement of fluid flow in closed conduits*, Subcommittee SC 5, *Velocity and mass methods*.

This third edition cancels and replaces the second edition (ISO 3966:2008), which has been technically revised.

The main changes compared to the previous edition are as follows:

- All the mathematical formulae have been numbered;
- The essential [Formula 4](#) has been corrected from $\Delta\rho/p$ to $\Delta p/p$;
- The related [Table 2](#) is corrected likewise;
- The last sentence in [8.2](#) “for selected values of g and the $\Delta\rho/p$” was corrected accordingly;
- In [11.2.2](#) in the 2nd paragraph ef is corrected by e or f .
- [Figure A.5](#) was changed editorially, the millimetre-grid has been removed.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
