Foreword.....	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	2
4 Flow rates	4
5 Test materials.....	4
5.1 Test liquid.....	4
5.2 Test contaminants for tests to determine instantaneous filtration efficiency and filter life.....	4
5.3 Test installation, general.....	5
6 Tests.....	5
6.1 Test for cleanliness of new filters.....	5
6.2 Fabrication integrity test.....	6
6.3 Test for differential pressure of new filters.....	6
6.4 Test for instantaneous filtration efficiency and filter life	7
6.5 Test for water separation efficiency	14
6.6 Collapse/burst test of the filter element	16
6.7 Burst test of complete filters	17
6.8 Pulsating pressure fatigue test	18
6.9 Vibration resistance fatigue test	20
Annex A (normative) Test liquid for fuel filter test	21
Annex B (normative) Test installations	22
Annex C (normative) Organic contaminant.....	37
Annex D (normative) Specification for carbon black powder used for the organic contaminant concentrate	40
Annex E (normative) Supplementary details for water separation test	42
Annex F (normative) Determination of the insoluble content	44
Annex G (normative) Diagram for showing instantaneous filtration efficiency and differential pressure versus choking time	47
Bibliography.....	48

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 3.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this International Standard may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

International Standard ISO 4020 was prepared by Technical Committee ISO/TC 22, *Road vehicles*, Subcommittee SC 7, *Injection equipment and filters for use on road vehicles*.

This first edition cancels and replaces ISO 4020-1:1979, which has been technically revised. The former Part 2 has been withdrawn.

Annexes A to G form a normative part of this International Standard.
