

ISO 4064-1

**Water meters for cold potable water
and hot water —**

Part 1:
**Metrological and technical
requirements**

*Compteurs d'eau potable froide et d'eau chaude —
Partie 1: Exigences métrologiques et techniques*

**Fifth edition
2024-12**

Foreword	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
3.1 Water meter and its constituents.....	2
3.2 Metrological characteristics.....	5
3.3 Operating conditions.....	7
3.4 Test conditions.....	8
3.5 Electronic and electrical equipment.....	10
4 Metrological requirements	11
4.1 Values of Q_1 , Q_2 , Q_3 , and Q_4	11
4.2 Accuracy class and maximum permissible error.....	12
4.2.1 General.....	12
4.2.2 Accuracy class 1 water meters.....	12
4.2.3 Accuracy class 2 water meters.....	12
4.2.4 Meter temperature classes.....	12
4.2.5 Water meters with separable calculator and measurement transducer.....	13
4.2.6 Relative error of indication.....	13
4.2.7 Reverse flow.....	13
4.2.8 Water temperature and water pressure.....	13
4.2.9 Absence of flow or of water.....	13
4.2.10 Static pressure.....	13
4.3 Requirements for meters and ancillary devices.....	13
4.3.1 Connections between electronic parts.....	13
4.3.2 Adjustment device.....	14
4.3.3 Correction device.....	14
4.3.4 Calculator.....	14
4.3.5 Indicating device.....	14
4.3.6 Ancillary devices.....	14
5 Water meters equipped with electronic devices	15
5.1 General requirements.....	15
5.2 Power supply.....	16
5.2.1 General.....	16
5.2.2 External power supply.....	16
5.2.3 Non-replaceable battery.....	16
5.2.4 Replaceable battery.....	17
6 Technical requirements	17
6.1 Materials and construction of water meters.....	17
6.2 Adjustment and correction.....	18
6.3 Installation conditions.....	18
6.4 Rated operating conditions.....	19
6.5 Pressure loss.....	19
6.6 Marks and inscriptions.....	20
6.7 Indicating device.....	21
6.7.1 General requirements.....	21
6.7.2 Types of indicating device.....	22
6.7.3 Verification devices — First element of an indicating device — Verification scale interval.....	23
6.8 Protection devices.....	24
6.8.1 General.....	24
6.8.2 Electronic sealing devices.....	24
7 Metrological controls	25
7.1 Reference conditions.....	25

7.2.2	Number of samples.....	25
7.2.3	Errors (of indication).....	26
7.2.4	Repeatability.....	26
7.2.5	Overload water temperature.....	26
7.2.6	Durability.....	26
7.2.7	Interchange error.....	27
7.2.8	Static magnetic field.....	27
7.2.9	Documentation.....	27
7.2.10	Type approval certificate.....	28
7.2.11	Modification of an approved type.....	28
7.2.12	Type evaluation of a water meter with electronic devices.....	29
7.3	Initial verification.....	29
Annex A (normative) Performance tests for water meters with electronic devices.....		31
Annex B (informative) Checking facilities.....		33
Annex C (informative) Permissible errors in service and subsequent verification.....		37
Annex D (normative) Requirements for software-controlled water meters.....		38
Bibliography.....		46

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 30, *Measurement of fluid flow in closed conduits*, Subcommittee SC 7, *Volume methods including water meters* and OIML Technical Subcommittee TC 8/SC 5, *Water meters*, in collaboration with the European Committee for Standardization (CEN) Technical Committee CEN/TC 92, *Water meters*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

This fifth edition of ISO 4064-1 cancels and replaces the fourth edition (ISO 4064-1:2014), which has been technically revised.

The main changes are as follows:

- a few editorial and technical changes were done throughout the document.

This edition of ISO 4064-1 is identical to the corresponding edition of OIML R 49-1, which has been issued concurrently. OIML R 49-1 was approved for final publication by the International Committee of Legal Metrology at its 59th meeting in October 2024. It will be submitted to the International Conference on Legal Metrology in 2025 for formal sanction.

A list of all parts in the ISO 4064 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
