

Fourth edition
2021-06

Small medical gas cylinders — Pin-index yoke-type valve connections

Petites bouteilles à gaz médicaux — Raccords de robinets du type étrier avec ergots de sécurité

Reference number
ISO 407:2021(E)

Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Valve	1
5 Yoke	2
6 Basic dimensions	2
6.1 General.....	2
6.2 Pin-index yoke-type valve body.....	3
6.3 Single-pin yoke-type valve connection system.....	4
6.4 Two-pin yoke-type valve connection system with the pins in a single row.....	4
6.5 Two-pin yoke-type valve connection system with the pins in a double row.....	5
6.6 Basic dimensions.....	5
7 Requirements for alternative designs of yoke-type valve connections	6
7.1 Requirements for the design of the connecting yoke.....	6
7.2 Examples of alternative construction for the connecting yoke.....	6
8 Dimensions and positions of the holes and pins for yoke-type valve connections	9
8.1 General.....	9
8.2 Outlet connection with single-pin system.....	9
8.3 Outlet connections with two-pin/single-row system.....	10
8.3.1 Outlet connection for oxygen.....	10
8.3.2 Outlet connection for oxygen/carbon dioxide mixture ($\text{CO}_2 \leq 7\%$).....	11
8.3.3 Outlet connection for oxygen/helium mixture ($\text{He} \leq 80\%$).....	11
8.3.4 Outlet connection for ethylene.....	12
8.3.5 Outlet connection for nitrous oxide (with or without liquid draw-off).....	12
8.3.6 Outlet connection for cyclopropane.....	13
8.3.7 Outlet connection for helium and for helium/oxygen mixture ($\text{O}_2 < 20\%$).....	13
8.3.8 Outlet connection for carbon dioxide (with or without liquid draw-off) and for carbon dioxide/oxygen mixture ($\text{CO}_2 > 7\%$).....	14
8.3.9 Outlet connection for medical air.....	14
8.3.10 Outlet connection for nitrogen.....	15
8.4 Outlet connection with two-pin/double-row system.....	15

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 58, *Gas cylinders*, Subcommittee SC 2, *Cylinders fittings*, in collaboration with the European Committee for Standardization (CEN) Technical Committee CEN/TC 23, *Transportable gas cylinders*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

This fourth edition cancels and replaces the third edition (ISO 407:2004), which has been technically revised.

The main changes compared to the previous edition are as follows:

- addition of a note in [Figure 1](#) on the introduction of a radius to avoid stress concentration;
- addition of dimension m in [Figure 1](#);
- revision of the basic dimensions for pin index yoke type valve connections (see [Table 2](#));
- addition of a requirement for the design of the connecting yoke.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
