Foreword.....	iv
Introduction.....	vi
1 Scope	1
2 Normative references	1
3 Terms and definitions.....	1
4 Symbols and abbreviated terms.....	3
5 Definition of the data contents and format.....	4
5.1 General considerations	4
5.2 Specifications for the data structure	5
5.3 Pointer section – Section 0	10
5.4 Header information - Patient data / ECG metadata – Section 1	12
5.5 Huffman tables – Section 2	28
5.6 ECG leads definition – Section 3.....	30
5.7 Reserved for legacy SCP-ECG versions – Section 4.....	39
5.8 Encoded type 0 reference beat data – Section 5	41
5.9 Short-term ECG Rhythm data – Section 6	44
5.10 Global ECG measurements – Section 7	46
5.11 Storage of full text interpretive statements – Section 8.....	60
5.12 Storage of manufacturer specific interpretive statements and data related to the overreading trail – Section 9	61
5.13 Per-lead ECG measurements – Section 10	61
5.14 Storage of the universal ECG interpretive statement codes – Section 11.....	70
5.15 Long-term ECG rhythm data – Section 12	74
5.16 Stress tests, Drug trials and Protocol based ECG recordings Metadata – Section 13	79
5.17 Selected ECG Sequences Repository – Section 14.....	90
5.18 Beat-by-Beat ECG measurements and annotations – Section 15.....	94
5.19 Selected ECG beats measurements and annotations – Section 16	109
5.20 Pacemaker Spikes measurements and annotations – Section 17	118
5.21 Additional ECG annotations – Section 18	132
Annex A (normative) Supplementary information and additional encoding specifications	139
Annex B (informative) Universal ECG interpretation statements codes	147
Annex C (informative) Definition of compliance with the SCP ECG standard	173
Annex D (Informative) Methodology of the recommended ECG signal compression technique	182
Annex E (informative) Cross-references to other ECG standards	217
Annex F (informative) Implementation Recommendations	220
Annex G (informative) Glossary	222
Annex H (informative) Revision History	224
Bibliography	227

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by the European Committee for Standardization (CEN) (as EN 1064:2020) and was adopted, without modification other than those given below by Technical Committee ISO/TC 215, *Health informatics*.

- changed "this Standard" or "this technical specification" to "this document" and "the present standard" or "this version of the standard" to respectively "the present document" or "this version of the document";
- changed any "EN ISO xxxx" references to "ISO xxxx" references;
- changed "section" to "clause" in 5.13.6, NOTE 10 and in Clause E.2;
- fixed the corrupted characters in the formula in D.4.8.10;
- corrected the wording in Table 8.

This first edition of ISO 41064 cancels and replaces ISO 11073-91064:2009, which has been technically revised.
