

Sixth edition
2001-09-01

Truck and bus tyres and rims (metric series) —

Part 1: Tyres

*Pneumatiques et jantes (séries millimétriques) pour camions et autobus —
Partie 1: Pneumatiques*

Reference number
ISO 4209-1:2001(E)

Contents

	Page
Foreword.....	v
1 Scope	1
2 Normative reference	1
3 Terms and definitions	1
4 Tyre designation	1
4.1 Content	1
4.2 Size and construction	2
4.2.1 Marking	2
4.2.2 Nominal section width.....	2
4.2.3 Nominal aspect ratio	2
4.2.4 Tyre construction code.....	2
4.2.5 Nominal rim diameter	2
4.3 Service condition characteristics	2
4.3.1 Marking	2
4.3.2 Load index.....	3
4.3.3 Speed symbol.....	3
4.4 Other service characteristics	3
4.5 Example	3
5 Tyre dimensions	4
5.1 Calculation of "design" tyre dimensions	4
5.1.1 Coefficients	4
5.1.2 Theoretical rim width, R_{th}	4
5.1.3 Measuring rim width, R_m	4
5.1.4 Design tyre section width, S	4
5.1.5 Design tyre section height, H	4
5.1.6 Design tyre overall diameter, D_o	4
5.1.7 Values	5
5.2 Calculation of "maximum overall tyre dimensions in service".....	5
5.2.1 Maximum overall width in service, W_{max}	5
5.2.2 Maximum overall diameter in service, $D_{o,max}$	5
5.3 Minimum dual spacing (MDS).....	5
5.4 Approved rim widths	7
6 Tyre dimension tables.....	8
7 Method of measurement of tyre dimensions	8
8 Service characteristics.....	8
8.1 Tyre load-carrying capacity	8
8.2 Speed symbol.....	8
8.3 Load-carrying capacity at various speeds.....	9
Annex A (informative) Guideline values for metric series, 5° rims	12
Annex B (informative) Guideline values for metric series, 15° rims	15
Annex C (informative) Tyre dimension tables	19

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 3.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this part of ISO 4209 may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

International Standard ISO 4209-1 was prepared by Technical Committee ISO/TC 31, *Tyres, rims and valves*, Subcommittee SC 4, *Truck and bus tyres and rims*.

This sixth edition cancels and replaces the fifth edition (ISO 4209-1:1993), which has been technically revised.

ISO 4209 consists of the following parts, under the general title *Truck and bus tyres and rims (metric series)*:

- *Part 1: Tyres*
- *Part 2: Rims*

Annexes A, B and C of this part of ISO 4209 are for information only.
