Second edition
2015-09-01

Cycles — Safety requirements for bicycles —

Part 2: Requirements for city and trekking, young adult, mountain and racing bicycles

Cycles — Exigences de sécurité des bicyclettes —

Partie 2: Exigences pour bicyclettes de ville et de randonnée, de jeune adulte, de montagne et de course

Foreword	v
Introduction	vi
1 Scope	1
2 Normative references	2
3 Terms and definitions	2
4 Requirements	2
4.1 Toxicity.....	2
4.2 Sharp edges.....	2
4.3 Security and strength of safety-related fasteners.....	2
4.3.1 Security of screws.....	2
4.3.2 Minimum failure torque.....	3
4.3.3 Folding bicycle mechanism.....	3
4.4 Crack detection methods.....	3
4.5 Protrusions.....	3
4.6 Brakes.....	3
4.6.1 Braking systems.....	3
4.6.2 Hand-operated brakes.....	4
4.6.3 Attachment of brake assembly and cable requirements.....	5
4.6.4 Brake-block and brake-pad assemblies — Security test.....	5
4.6.5 Brake adjustment.....	6
4.6.6 Hand-operated braking-system — Strength test.....	6
4.6.7 Back-pedal braking system — Strength test.....	6
4.6.8 Braking performance.....	6
4.6.9 Brakes — Heat-resistance test.....	9
4.7 Steering.....	9
4.7.1 Handlebar — Dimensions.....	9
4.7.2 Handlebar grips and plugs.....	10
4.7.3 Handlebar stem — Insertion-depth mark or positive stop.....	10
4.7.4 Handlebar stem to fork steerer — Clamping requirements.....	10
4.7.5 Steering stability.....	11
4.7.6 Steering assembly — Static strength and security tests.....	11
4.7.7 Handlebar and stem assembly — Fatigue test.....	13
4.8 Frames.....	13
4.8.1 Suspension-frames — Special requirements.....	13
4.8.2 Frame — Impact test (falling mass).....	13
4.8.3 Frame and front fork assembly — Impact test (falling frame).....	14
4.8.4 Frame — Fatigue test with pedalling forces.....	14
4.8.5 Frame — Fatigue test with horizontal forces.....	14
4.8.6 Frame — Fatigue test with a vertical force.....	14
4.9 Front fork.....	14
4.9.1 General.....	14
4.9.2 Means of location of the axle and wheel retention.....	14
4.9.3 Suspension forks — Special requirements.....	15
4.9.4 Front fork — Static bending test.....	15
4.9.5 Front fork — Rearward impact test.....	15
4.9.6 Front fork — Bending fatigue test plus rearward impact test.....	15
4.9.7 Forks intended for use with hub- or disc-brakes.....	16
4.9.8 Tensile test for a non-welded fork.....	16
4.10 Wheels and wheel/tyre assembly.....	16
4.10.1 Wheels/tyre assembly — Concentricity tolerance and lateral tolerance.....	16
4.10.2 Wheel/tyre assembly — Clearance.....	16
4.10.3 Wheel/tyre assembly — Static strength test.....	17
4.10.4 Wheels — Wheel retention.....	17

4.10.5	Wheels — Quick-release devices — Operating features	18
4.11	Rims, tyres, and tubes	18
4.11.1	General	18
4.11.2	Tyre inflation pressure	18
4.11.3	Tyre and rim compatibility	18
4.11.4	Tubular tyres and rims	18
4.11.5	Rim-wear	19
4.11.6	Greenhouse effect test for composite wheels	19
4.12	Front mudguard	19
4.13	Pedals and pedal/crank drive system	19
4.13.1	Pedal tread	19
4.13.2	Pedal clearance	20
4.13.3	Pedal — Static strength test	21
4.13.4	Pedal — Impact test	21
4.13.5	Pedal — Dynamic durability test	21
4.13.6	Drive system — Static strength test	21
4.13.7	Crank assembly — Fatigue test	22
4.14	Drive-chain and drive belt	22
4.14.1	Drive-chain	22
4.14.2	Drive belt	22
4.15	Chain-wheel and belt-drive protective device	22
4.15.1	Requirements	22
4.15.2	Chain-wheel disc and drive pulley disc diameter	23
4.15.3	Chain and drive belt protective device	24
4.15.4	Combined front gear-change guide	25
4.16	Saddles and seat-posts	26
4.16.1	Limiting dimensions	26
4.16.2	Seat-post — Insertion-depth mark or positive stop	26
4.16.3	Saddle/seat-post — Security test	26
4.16.4	Saddle — Static strength test	27
4.16.5	Saddle and seat-post clamp — Fatigue test	27
4.16.6	Seat-post — Fatigue test	27
4.17	Spoke protector	27
4.18	Luggage carriers	28
4.19	Road test of a fully assembled bicycle	28
4.20	Lighting systems and reflectors	28
4.20.1	General	28
4.20.2	Wiring harness	28
4.20.3	Lighting systems	28
4.20.4	Reflectors	28
4.21	Warning device	29
5	Manufacturer's instructions	29
6	Marking	31
6.1	Requirement	31

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the WTO principles in the Technical Barriers to Trade (TBT) see the following URL: [Foreword - Supplementary information](#)

The committee responsible for this document is ISO/TC 149, *Cycles*, Subcommittee SC 1, *Cycles and major sub-assemblies*.

This second edition cancels and replaces the first edition (ISO 4210-2:2014), which has been technically revised.

ISO 4210 consists of the following parts, under the general title *Cycles — Safety requirements for bicycles*:

- *Part 1: Terms and definitions*
- *Part 2: Requirements for city and trekking, young adult, mountain and racing bicycles*
- *Part 3: Common test methods*
- *Part 4: Braking test methods*
- *Part 5: Steering test methods*
- *Part 6: Frame and fork test methods*
- *Part 7: Wheels and rim test methods*
- *Part 8: Pedal and drive system test methods*
- *Part 9: Saddles and seat-post test methods*

Introduction

This International Standard has been developed in response to demand throughout the world, and the aim has been to ensure that bicycles manufactured in compliance with this International Standard will be as safe as is practically possible. The tests have been designed to ensure the strength and durability of individual parts as well as of the bicycle as a whole, demanding high quality throughout and consideration of safety aspects from the design stage onwards.

The scope has been limited to safety considerations and has specifically avoided standardization of components.

If the bicycle is to be used on public roads, national regulations apply.

For the purposes of improving repeatability and reproducibility and considering the applicability to all types of bicycle and the size and influence of the operator, the machine test method reflects today's state of the art and is preferred to the track test method.

Unless there is evidence of improvement of the test track method in the future, this method will be made informative for the next revision. Users of this International Standard are invited to provide their feedback to ISO/TC 149/SC 1.
