Third edition
2017-10

Corrected version
2019-03

Agricultural machinery — Safety —

Part 7:

Combine harvesters, forage harvesters, cotton harvesters and sugar cane harvesters

Matériel agricole — Sécurité —

*Partie 7: Moissonneuses-batteuses, récolteuses-hacheuses-chargeuses
de fourrage, récolteuses de coton et récolteuses de cannes à sucre*

Reference number

Foreword	vi
Introduction	viii
1 Scope	1
2 Normative references	1
3 Terms and definitions	2
4 Safety requirements and/or protective/risk reduction measures for all machines	3
4.1 General.....	3
4.2 Controls.....	3
4.2.1 Location and identification of controls.....	3
4.2.2 Control clearances.....	4
4.2.3 Starting and stopping the engine.....	4
4.3 Operator's work station.....	4
4.3.1 Operator's seat.....	4
4.3.2 Instructional seat.....	4
4.3.3 Steering wheel.....	5
4.3.4 Shearing and pinching points.....	5
4.3.5 Boarding means.....	6
4.3.6 Handrails and handholds.....	6
4.3.7 Platforms.....	6
4.3.8 Access to operator's seat.....	7
4.3.9 Automatic header disengagement control.....	7
4.3.10 Warnings.....	7
4.3.11 Visibility — View to front and rear.....	7
4.3.12 Cabins.....	8
4.4 Other than operator's work station.....	9
4.5 Folding elements.....	9
4.6 Interchangeable and detachable harvesting devices.....	10
4.7 Automatic guidance systems.....	10
4.8 Hot surfaces.....	10
4.9 Service and maintenance.....	10
4.9.1 Manual operation of individual assemblies.....	10
4.9.2 Electric — Battery.....	10
4.9.3 Operating fluids.....	11
4.9.4 Supports for service and maintenance of raised machine parts.....	11
4.9.5 Tie-down and jacking points.....	11
4.9.6 Greasing.....	11
4.10 Fire hazard.....	11
4.11 Overhead power lines.....	12
4.12 Header drive.....	12
4.13 Header/feeding elements drive reverser.....	12
4.14 Header hold-up.....	12
4.15 Noise.....	12
4.16 Hydraulic components and fittings.....	13
4.17 Electric equipment.....	13
5 Additional requirements for combine harvesters	13
5.1 General.....	13
5.2 Cabin.....	13
5.3 Cutting mechanism, feed augers, reel.....	13
5.4 Grain tank and grain handling systems.....	14
5.4.1 Grain tank design.....	14
5.4.2 Access into the grain tank.....	14
5.4.3 Distribution auger.....	14

Bibliography 45

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 23, *Tractors and machinery for agriculture and forestry*, Subcommittee SC 7, *Equipment for harvesting and conservation*.

This third edition cancels and replaces the second edition (ISO 4254-7:2008), which has been technically revised.

The main changes compared to the previous edition are as follows:

- additions to the Scope and of requirements for sugar cane harvesters;
- replacement of the reference to ISO 4254-1:2008 by ISO 4254-1:2013;
- addition of references to ISO 3776-3 and ISO 10975;
- deletion of the references to ISO 12100-1:2003 and ISO 12100-2:2003 and replacement with ISO 12100:2010;
- list of significant hazards (Clause 4) as new informative [Annex A](#);
- in [Clause 4](#), for all machines, replacement of requirements by reference to ISO 4254-1:2013 for the following:
 - operator's seat and addition of a references to ISO 3776-3;
 - handrails and handholds with a modification;
 - operator platform;
 - other boarding means;

This is a preview of "ISO 4254-7:2017". Click [here](#) to purchase the full version from the ANSI store.

- supports for service and maintenance;
- modification of the requirements for the following:
 - visibility — view to front and rear;
 - disconnection of the battery;
 - greasing;
 - boarding means;
- addition of requirements for the following:
 - forward and rearward facing work lights;
 - cleaning the machine;
 - header hold-up;
- instructional seat: deletion of the requirement that anchorage points for a restraint system have to be provided and addition for a requirement that a restraint system has to be provided in the event of a rollover;
- replacement of the requirements for automatic guidance systems by a reference to ISO 10975;
- in [Clause 5](#), for combine harvesters:
 - clean grain and returns handling systems: addition of information for explanation for better understanding of the requirements;
 - straw choppers: addition of requirement for replacing blades;
- in [Clause 6](#), for forage harvesters:
 - modification of the requirements for run-down of rotating functional elements in the crop flow system.

A list of all parts in the ISO 4254 series can be found on the ISO website.

This corrected version of ISO 4254-7:2017 incorporates the following corrections:

- [Figure 2](#) has been replaced to show the correct dimensions.

Introduction

This document is a type-C standard as stated in ISO 12100.

This document is of relevance, in particular, for the following stakeholder groups representing the market players with regard to machinery safety:

- machine manufacturers (small, medium and large enterprises);
- health and safety bodies (regulators, accident prevention organizations, market surveillance, etc.).

Others can be affected by the level of machinery safety achieved with the means of the document by the above-mentioned stakeholder groups:

- machine users/employers (small, medium and large enterprises);
- machine users/employees (e.g. trade unions, organizations for people with special needs);
- service providers, e.g. for maintenance (small, medium and large enterprises);
- consumers (in the case of machinery intended for use by consumers).

The above-mentioned stakeholder groups have been given the possibility to participate at the drafting process of this document.

The machinery and systems concerned and the extent to which hazards, hazardous situations or hazardous events are covered are indicated in the Scope of this document.

When requirements of this type-C standard are different from those which are stated in type-A or B standards, the requirements of this type-C standard take precedence over the requirements of the other standards for machines that have been designed and built according to the requirements of this type-C standard.

The machinery concerned and the extent to which hazards, hazardous situations and events are covered are indicated in the Scope of this document. These hazards are specific to combine harvesters, forage harvesters, cotton harvesters and sugar cane harvesters.

Significant hazards that are common to all the agricultural machines (self-propelled ride-on, mounted, semi-mounted and trailed) are dealt with in ISO 4254-1.
