

Second edition  
2023-07

---

---

# **Petroleum and liquid petroleum products — Measurement of level and temperature in storage tanks by automatic methods —**

## **Part 4: Measurement of temperature in atmospheric tanks**

*Pétrole et produits pétroliers liquides — Mesurage du niveau et de la température dans les réservoirs de stockage par méthodes automatiques —*

*Partie 4: Mesurage de la température dans les réservoirs à pression atmosphérique*

<b>Foreword</b> .....	<b>v</b>
<b>1 Scope</b> .....	<b>1</b>
<b>2 Normative references</b> .....	<b>1</b>
<b>3 Terms and definitions</b> .....	<b>1</b>
<b>4 Precautions</b> .....	<b>2</b>
4.1 Safety precautions.....	2
4.2 Equipment precautions.....	2
4.3 General precautions.....	3
<b>5 Accuracy</b> .....	<b>3</b>
5.1 General.....	3
5.2 Intrinsic error of ATTs.....	3
5.3 Calibration prior to installation.....	4
5.3.1 General.....	4
5.3.2 ATT calibrated as a system.....	4
5.3.3 ATT calibrated by components.....	4
5.3.4 Multiple-point ATTs.....	4
5.3.5 Variable-length ATTs.....	4
5.3.6 Uncertainty of the reference.....	4
5.4 Error caused by installation and operating conditions.....	4
5.5 Overall accuracy.....	5
5.5.1 General.....	5
5.5.2 Use of ATT for fiscal/custody transfer purposes.....	5
<b>6 Selection of ATTs</b> .....	<b>5</b>
6.1 General.....	5
6.2 ATTs for fiscal/custody transfer purposes.....	6
<b>7 Description of ATT equipment</b> .....	<b>6</b>
7.1 General.....	6
7.2 Electrical temperature elements.....	6
7.2.1 Resistance temperature detectors.....	6
7.2.2 Other temperature elements.....	7
<b>8 Installation of ATTs</b> .....	<b>7</b>
8.1 General.....	7
8.2 Single-point (spot) temperature elements.....	7
8.3 Averaging temperature elements.....	7
8.3.1 General.....	7
8.3.2 Upper, middle and lower temperature elements.....	7
8.3.3 Multiple-point temperature elements.....	7
8.3.4 Variable-length RTD temperature elements.....	8
8.3.5 Mid-level temperature element.....	8
8.3.6 Moveable spot temperature element.....	8
8.4 Thermowells for electronic temperature elements.....	9
<b>9 Calibration and field verification of ATTs</b> .....	<b>11</b>
9.1 General.....	11
9.2 Calibration of single-point, or mid-level temperature element ATTs for fiscal/ custody transfer purposes.....	11
9.2.1 Calibration prior to installation.....	11
9.2.2 Initial field verification.....	11
9.3 Calibration of upper, middle and lower or multiple-point ATTs for fiscal/custody transfer purposes.....	12
9.3.1 Calibration prior to installation.....	12
9.3.2 Initial field verification.....	12

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at [www.iso.org/patents](http://www.iso.org/patents). ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html).

This document was prepared by Technical Committee ISO/TC 28, *Petroleum and related products, fuels and lubricants from natural or synthetic sources*, Subcommittee SC 2, *Measurement of petroleum and related products*.

This second edition cancels and replaces the first edition (ISO 4266-4:2002), which has been technically revised.

The main changes are as follows:

- in [4.3.2](#), it has been clarified that the tank level should be measured and recorded simultaneously with the temperature;
- in [9.2](#), it has been clarified that individual component verification is optional, but verification as a whole system is required.

A list of all parts in the ISO 4266 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at [www.iso.org/members.html](http://www.iso.org/members.html).
