Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Principle	1
5 Test methods	2
5.1 General	2
5.2 Volumetric titration method	2
5.3 Coulometric titration method	6
6 Precision	9
6.1 Precision of the volumetric titration method	9
6.2 Precision of the coulometric titration method	9
7 Test report	10
Annex A (informative) Preparation of Karl Fischer reagent containing pyridine	11
Annex B (informative) Interlaboratory test results	12
Bibliography	14

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 4317 was prepared by Technical Committee ISO/TC 91, *Surface active agents*.

This third edition cancels and replaces the second edition (ISO 4317:1991), which has been technically revised to incorporate the following changes:

- the coulometric titration method in 5.3 has been added;
- the former Annex B has been deleted;
- interlaboratory test results have been added in a new Annex B;
- the Bibliography has been added.
