## ISO 4345

# Steel wire ropes — Fibre main cores — Specifications

*Câbles en acier — Âmes centrales textiles — Spécifications*

Third edition  
2025-02

<b>Foreword</b> .....	<b>iv</b>
<b>1 Scope</b> .....	<b>1</b>
<b>2 Normative references</b> .....	<b>1</b>
<b>3 Terms and definitions</b> .....	<b>1</b>
<b>4 Material</b> .....	<b>2</b>
4.1 Natural fibre cores.....	2
4.2 Man-made fibre cores.....	2
<b>5 Construction</b> .....	<b>2</b>
<b>6 Core designation</b> .....	<b>2</b>
<b>7 Tolerances</b> .....	<b>2</b>
7.1 Tolerance on length.....	2
7.2 Tolerance on nominal diameter.....	2
7.3 Tolerance on nominal linear density.....	3
<b>8 Core lubricants</b> .....	<b>3</b>
<b>9 Moisture regain</b> .....	<b>3</b>
<b>10 Water soluble acids</b> .....	<b>3</b>
<b>11 Salt</b> .....	<b>4</b>
<b>12 Packaging and marking</b> .....	<b>4</b>
<b>Annex A (normative) Determination of core diameter</b> .....	<b>5</b>
<b>Annex B (normative) Determination of core linear density</b> .....	<b>6</b>
<b>Annex C (normative) Determination of moisture regain and core lubricant content</b> .....	<b>7</b>
<b>Annex D (normative) Determination of water-soluble acids</b> .....	<b>11</b>
<b>Annex E (normative) Determination of salt content</b> .....	<b>12</b>

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at [www.iso.org/patents](http://www.iso.org/patents). ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html).

This document was prepared by Technical Committee ISO/TC 105, *Steel wire ropes*.

This third edition cancels and replaces the second edition (ISO 4345:1988), which has been technically revised.

The main changes are as follows:

- the tolerances for length and nominal diameter have been modified;
- the technical indicator and test method of moisture regain have been added;
- the test method and formula of water solution acid have been modified;
- the formula for calculating salt content has been added;
- the term "runnage" has been replaced by "linear density".

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at [www.iso.org/members.html](http://www.iso.org/members.html).
