Contents

	Page
1 Scope	1
2 Normative references	1
3 Terms and definitions	2
4 Information to be supplied to the electroplater	2
5 Service condition number	2
6 Designation	3
7 Requirements	5
8 Sampling	7
9 Test methods	7

Annexes

A Thermal cycle test	8
B Examples of service conditions for which the various service condition numbers are appropriate	9
C Ductility test.....	10
D Determination of sulfur content of electrodeposited nickel	11
E Determination of cracks and pores in chromium coatings	12
F Methods of test for the determination of thickness.....	13
G Combined thermal cycle and corrosion testing.....	14
Bibliography.....	15

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 3.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this International Standard may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

International Standard ISO 4525 was prepared by Technical Committee ISO/TC 107, *Metallic and other inorganic coatings*, Subcommittee SC 3, *Electrodeposited coatings and related finishes*.

This second edition cancels and replaces the first edition (ISO 4525:1985), which has been technically revised.

Annexes A, C, D, E, F and G form a normative part of this International Standard. Annex B is for information only.
