Fourth edition
2015-06-01

Rubber seals — Joint rings for water supply, drainage and sewerage pipelines — Specification for materials

Joints étanches en caoutchouc — Garnitures de joints de canalisations d'adduction et d'évacuation d'eau (égouts inclus) — Spécification des matériaux

Reference number
ISO 4633:2015(E)

Foreword	iv
1 Scope	1
2 Normative references	1
3 Classification	2
4 Requirements	2
4.1 Requirements for materials.....	2
4.1.1 General.....	2
4.1.2 Effect on water quality.....	2
4.1.3 Microbiological deterioration.....	2
4.2 Requirements for finished seals.....	3
4.2.1 Dimensional tolerances.....	3
4.2.2 Imperfections and defects.....	3
4.2.3 Hardness.....	3
4.2.4 Tensile strength and elongation at break.....	3
4.2.5 Compression set in air.....	3
4.2.6 Accelerated ageing in air.....	4
4.2.7 Stress relaxation in compression.....	4
4.2.8 Volume change in water.....	4
4.2.9 Ozone resistance.....	5
4.2.10 Splices of prevulcanized profile ends.....	5
4.3 Optional requirements.....	5
5 Test pieces and test temperature	6
5.1 Preparation of test pieces.....	6
5.2 Test temperature.....	7
6 Quality assurance	7
7 Storage	7
8 Designation	7
9 Marking and labelling	8
Annex A (normative) Determination of splice strength	9
Annex B (informative) Quality assurance	10
Annex C (informative) Guidance on storage of seals	11
Bibliography	12

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the WTO principles in the Technical Barriers to Trade (TBT) see the following URL: [Foreword - Supplementary information](#).

The committee responsible for this document is ISO/TC 45, *Rubber and rubber products*, Subcommittee SC 4, *Products (other than hoses)*.

This fourth edition cancels and replaces the third edition (ISO 4633:2002), which has been technically revised.
