<b>Foreword</b> .....	<b>iv</b>
<b>1 Scope</b> .....	<b>1</b>
<b>2 Normative references</b> .....	<b>1</b>
<b>3 Principle</b> .....	<b>1</b>
3.1 Analysis by transmission.....	1
3.2 Analysis by reflectance.....	1
<b>4 Types of rubber</b> .....	<b>2</b>
4.1 General.....	2
4.2 Exceptions for blends.....	3
4.3 Reference spectra.....	4
<b>5 Reagents</b> .....	<b>4</b>
<b>6 Apparatus</b> .....	<b>4</b>
<b>7 Procedure for infrared spectrometric examination using the transmission technique</b> .....	<b>6</b>
7.1 Procedure for raw rubber films moulded or cast from solution.....	6
7.2 Procedure for raw rubbers, vulcanizates and films obtained from pyrolysate.....	6
7.3 Procedure for vulcanized rubber film obtained after evaporation of the solution solvent..	7
<b>8 Procedure for attenuated total reflectance (ATR or micro-ATR) surface analysis</b> .....	<b>8</b>
<b>9 Interpretation of spectra</b> .....	<b>8</b>
9.1 Reference spectra.....	8
9.2 Tables of diagnostic absorptions.....	9
<b>10 Test report</b> .....	<b>9</b>
<b>Annex A (informative) Comparison of reflectance and transmission spectra</b> .....	<b>10</b>
<b>Annex B (informative) Absorption characteristics and reference spectra</b> .....	<b>11</b>
<b>Bibliography</b> .....	<b>88</b>

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 4650 was prepared by Technical Committee ISO/TC 45, *Rubber and rubber products*, Subcommittee SC 2, *Testing and analysis*.

This third edition cancels and replaces the second edition (ISO 4650:2005), which has been technically revised.
