Foreword ... **iv**

1 Scope ... **1**

2 Normative references ... **1**

3 Terms and definitions ... **1**

4 Principle ... **1**
4.1 General ... 1
4.2 Analysis by transmission ... 1
4.3 Analysis by reflectance ... 2

5 Types of rubber ... **2**
5.1 General ... 2
5.2 M group ... 2
5.3 O group ... 2
5.4 Q group ... 2
5.5 R group ... 2
5.6 T group ... 3
5.7 U group ... 3
5.8 TPE group ... 3
5.9 Exceptions for blends ... 3
5.10 Reference spectra ... 4

6 Reagents ... **4**

7 Apparatus ... **4**

8 Procedure for infrared spectrometric examination using the transmission technique ... **6**
8.1 Procedure for raw rubber films moulded or cast from solution ... 6
8.2 Procedure for raw rubbers, vulcanizates and films obtained from pyrolysate ... 6
8.2.1 General ... 6
8.2.2 Preferred method: Temperature-controlled pyrolysis in a stream of nitrogen ... 6
8.2.3 Alternative method: Gas flame pyrolysis ... 7
8.3 Procedure for vulcanized rubber film obtained after evaporation of the solution solvent ... 7
8.3.1 General ... 7
8.3.2 Dissolution of vulcanizate ... 7
8.3.3 Mild thermal degradation of vulcanizates ... 7

9 Procedure for attenuated total reflectance (ATR) or micro-ATR surface analysis ... **8**

10 Interpretation of spectra ... **8**
10.1 Reference spectra ... 8
10.2 Tables of diagnostic absorptions ... 8

11 Test report ... **9**

Annex A (informative) **Comparison of reflectance and transmission spectra** ... **10**

Annex B (informative) **Absorption characteristics and reference spectra** ... **11**

Bibliography ... **79**

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 45, *Rubber and rubber products*, Subcommittee SC 2, *Testing and analysis*.

This fourth edition cancels and replaces the third edition (ISO 4650:2012), which has been technically revised.

The main change is as follows:

— replacement of some of the reference spectra in Annex B.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
