

ISO 4954-2

Steels for cold heading and cold extruding — Technical delivery conditions —

**Part 2:
Stainless steels**

*Aciers pour transformation à froid et extrusion à froid —
Conditions techniques de livraison —*

Partie 2: Aciers inoxydables

**First edition
2024-06**

Foreword	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	2
4 Classification and designation	2
4.1 Classification.....	2
4.2 Designation.....	3
5 Information to be supplied by the purchaser	3
5.1 Mandatory information.....	3
5.2 Options and/or supplementary or special requirements.....	3
5.3 Ordering example.....	4
6 Manufacturing process	4
6.1 General.....	4
6.2 Deoxidation.....	4
6.3 Heat-treatment condition and surface condition at delivery.....	4
6.3.1 Heat-treatment condition.....	4
6.3.2 Particular surface conditions.....	4
6.4 Traceability of the cast.....	4
6.5 Statistical evaluation.....	5
7 Requirements	5
7.1 Chemical composition, mechanical properties and hardenability.....	5
7.1.1 General.....	5
7.1.2 Chemical composition.....	5
7.1.3 Mechanical properties.....	6
7.2 Grain size.....	6
7.3 Non-metallic inclusions.....	6
7.4 Internal soundness.....	6
7.5 Aptitude to cold forming.....	6
7.6 Surface quality.....	7
7.6.1 General.....	7
7.6.2 Wire rod and bars.....	7
7.6.3 Bright products and wire.....	7
7.6.4 Removal of surface discontinuities.....	7
7.6.5 Non-destructive testing of the surface.....	7
7.7 Corrosion resistance.....	7
7.8 Shape, dimensions and tolerances.....	7
8 Inspection	7
8.1 Testing procedures and types of documents.....	7
8.2 Summary of specific inspection and frequency of testing.....	8
9 Preparation of samples and test pieces	9
9.1 Selection and preparation of samples for product analysis.....	9
9.2 Selection and preparation of samples and test pieces for the mechanical test.....	9
10 Test methods	9
10.1 Chemical analysis.....	9
10.2 Mechanical tests.....	9
10.3 Non-destructive testing.....	10
10.4 Aptitude to cold forming — Upsetting test.....	10
10.5 Visual and dimensional test.....	10
10.6 Retests.....	10
11 Surface treatment, marking and packaging	10
11.1 Surface treatment.....	10

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 17, *Steel*, Subcommittee SC 4, *Heat treatable and alloy steels*.

This first edition of ISO 4954-2, together with ISO 4954-1 cancels and replaces ISO 4954:2022, which has been technically revised.

The main changes are as follows:

- new [Annex B](#) was added for the comparison with steel grades mentioned in ISO 3506.

A list of all parts in the ISO 4954 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
