| <b>Foreword</b> .....  | <b>iv</b> |
| <b>1 Scope</b> .....   | <b>1</b>  |
| <b>2 Normative references</b> .....  | <b>1</b>  |
| <b>3 Terms and definitions</b> .....   | <b>2</b>  |
| <b>4 Classification and designation</b> .....                                | <b>2</b>  |
| 4.1 Classification.....  | 2         |
| 4.2 Designation.....   | 2         |
| <b>5 Information to be supplied by the purchaser</b> .....                   | <b>3</b>  |
| 5.1 Mandatory information.....   | 3         |
| 5.2 Options.....   | 3         |
| 5.3 Ordering example.....  | 3         |
| <b>6 Manufacturing process</b> .....   | <b>3</b>  |
| 6.1 General.....   | 3         |
| 6.2 Heat-treatment condition and surface condition on delivery.....          | 4         |
| 6.2.1 General.....   | 4         |
| 6.2.2 Heat-treatment condition.....  | 4         |
| 6.2.3 Surface condition.....   | 4         |
| <b>7 Requirements</b> .....  | <b>4</b>  |
| 7.1 General requirements.....  | 4         |
| 7.2 Chemical composition and mechanical properties.....                      | 4         |
| 7.3 Surface quality.....   | 4         |
| 7.4 Shape, dimensions and tolerances.....                                    | 5         |
| <b>8 Inspection, testing and conformance of products</b> .....               | <b>5</b>  |
| 8.1 Inspection and testing procedures and types of inspection documents..... | 5         |
| 8.2 Specific inspection and testing.....                                     | 6         |
| 8.2.1 Number of sample products.....   | 6         |
| 8.2.2 Sampling.....  | 6         |
| 8.2.3 Test methods.....  | 6         |
| 8.2.4 Retests.....   | 6         |
| 8.2.5 Sorting and reprocessing.....  | 7         |
| <b>9 Marking</b> .....   | <b>7</b>  |
| <b>10 Tables</b> .....   | <b>7</b>  |
| <b>11 Location of test pieces in the hardening test</b> .....                | <b>17</b> |
| 11.1 Product diameter or thickness $\geq 15$ mm.....                         | 17        |
| 11.2 Product diameter or thickness $< 15$ mm.....                            | 18        |
| <b>Annex A (informative) Hardness-tempering temperature curves</b> .....     | <b>19</b> |
| <b>Annex B (normative) Supplementary or special requirements</b> .....       | <b>29</b> |
| <b>Annex C (informative) Designations of comparable steels</b> .....         | <b>31</b> |
| <b>Bibliography</b> .....  | <b>33</b> |

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see [www.iso.org/patents](http://www.iso.org/patents)).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html).

This document was prepared by Technical Committee ISO/TC 17, *Steel*, Subcommittee SC 4, *Heat treatable and alloy steels*.

This third edition cancels and replaces the second edition (ISO 4957:1999), which has been technically revised.

The main changes compared with the previous edition are as follows:

- the delivery condition normalized/normalized rolled has been introduced;
- for surface quality, ISO 9443 for bars and ISO 7788 for plates now apply;
- an additional clause for sorting and reprocessing has been introduced;
- the normative references have been updated.
