Contents

	Page
Foreword	iv
1 Scope	1
2 Principle	1
3 Sampling	2
4 Preparation of specimens	6
5 Determination of the content of inclusions	6
5.1 Method of observation.....	6
5.2 Actual examination.....	7
6 Expression of results	9
6.1 General.....	9
6.2 Case of method A.....	9
6.3 Case of method B.....	9
7 Test report	10
Annex A (normative) ISO Chart diagrams for inclusion groups A, B, C, D and DS	11
Annex B (informative) Assessment of a field and of oversized inclusions or stringers	26
Annex C (informative) Typical example of results (the total number of fields showing the index, by type of inclusion, for a given number of fields observed)	29
Annex D (informative) Relationship between chart diagram indices and inclusion measurements	33

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2. www.iso.org/directives

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received. www.iso.org/patents

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

The committee responsible for this document is ISO/TC 17, *Steel*, Subcommittee SC 7, *Methods of testing (other than mechanical tests and chemical analysis)*.

This third edition cancels and replaces the second edition (ISO 4967:1998), of which it constitutes a minor revision.
