

## Cold-reduced carbon steel sheet of structural quality

*Tôles en acier au carbone laminées à froid, de qualité destinée à la construction*

**ISO 4997**

**Sixth edition  
2025-04**

<b>Foreword</b> .....	<b>iv</b>
<b>1 Scope</b> .....	<b>1</b>
<b>2 Normative references</b> .....	<b>1</b>
<b>3 Terms and definitions</b> .....	<b>1</b>
<b>4 Dimensions</b> .....	<b>2</b>
<b>5 Conditions of manufacture</b> .....	<b>2</b>
5.1 Steelmaking.....	2
5.2 Chemical composition.....	2
5.3 Chemical analysis.....	3
5.3.1 Heat analysis.....	3
5.3.2 Product analysis.....	3
5.4 Weldability.....	3
5.5 Application.....	4
5.6 Mechanical properties.....	4
5.7 Surface quality.....	4
5.7.1 General.....	4
5.7.2 Surface quality A (unexposed).....	4
5.7.3 Surface quality B (exposed).....	4
5.8 Surface finish.....	5
5.9 Suitability for surface coating.....	5
5.10 Oiling.....	5
<b>6 Dimensional and shape tolerances</b> .....	<b>5</b>
<b>7 Tensile-test sampling</b> .....	<b>5</b>
<b>8 Tensile test</b> .....	<b>5</b>
<b>9 Retests</b> .....	<b>6</b>
9.1 Machining and flaws.....	6
9.2 Elongation.....	6
9.3 Additional tests.....	6
<b>10 Resubmission</b> .....	<b>6</b>
<b>11 Workmanship</b> .....	<b>6</b>
<b>12 Inspection and acceptance</b> .....	<b>6</b>
<b>13 Coil size</b> .....	<b>7</b>
<b>14 Marking</b> .....	<b>7</b>
<b>15 Information to be supplied by the purchaser</b> .....	<b>7</b>
<b>Bibliography</b> .....	<b>8</b>

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at [www.iso.org/patents](http://www.iso.org/patents). ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html).

This document was prepared by Technical Committee ISO/TC 17, *Steel*, Subcommittee SC 12, *Continuous mill flat rolled products*.

This sixth edition cancels and replaces the fifth edition (ISO 4997:2015), which has been technically revised.

The main changes are as follows:

- [Clause 1](#), [3.2](#), [5.2](#), [5.6](#): grade CR280 and pertaining requirements have been added;
- [3.4](#): definition of lot has been updated;
- [5.3.2](#): requirement of product analysis has been updated;
- [5.8.3](#): roughness reference values recommended have been added;
- [Clause 14](#): requirement of marking has been updated;
- [Clause 15](#): requirement of information to be provided by the purchaser has been updated.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at [www.iso.org/members.html](http://www.iso.org/members.html).
