Fifth edition  
2019-05

---

---

## **Steel sheet, aluminium-silicon alloy-coated by the continuous hot-dip process, of commercial and drawing qualities**

*Tôles en acier au carbone laminées à froid, revêtues par immersion à chaud en continu d'une couche d'aluminium-silicium, de qualité commerciale et pour emboutissage*

Reference number  
ISO 5000:2019(E)

## Contents

	Page
<b>Foreword</b> .....	<b>v</b>
<b>1 Scope</b> .....	<b>1</b>
<b>2 Normative references</b> .....	<b>1</b>
<b>3 Terms and definitions</b> .....	<b>1</b>
<b>4 Dimensions</b> .....	<b>2</b>
<b>5 Conditions of manufacture</b> .....	<b>3</b>
5.1 Steelmaking.....	3
5.2 Chemical composition.....	3
5.3 Chemical analysis.....	3
5.3.1 Heat analysis.....	3
5.3.2 Product analysis.....	3
5.4 Mechanical properties.....	4
5.4.1 Ordering conditions.....	4
5.4.2 Fabrication qualities.....	4
5.4.3 Interstitial free steel.....	5
5.5 Coating.....	6
5.5.1 Silicon content.....	6
5.5.2 Coating mass.....	6
5.5.3 Coating adherence.....	6
5.6 Weldability.....	7
5.7 Coating finish condition.....	7
5.8 Surface treatment.....	7
5.8.1 Mill passivation.....	7
5.8.2 Oiling.....	7
5.9 Coated coil joining.....	7
5.10 Dimensional and shape tolerances.....	7
<b>6 Sampling</b> .....	<b>8</b>
6.1 Tensile test.....	8
6.2 Coating tests.....	8
6.2.1 Coating mass.....	8
6.2.2 Triple-spot test.....	8
6.2.3 Single-spot test.....	8
6.2.4 Coating adherence.....	8
<b>7 Test methods</b> .....	<b>8</b>
7.1 Tensile test.....	8
7.2 Coating properties.....	9
7.2.1 Coating mass.....	9
7.2.2 Coating adherence.....	9
<b>8 Designation system</b> .....	<b>9</b>
8.1 General.....	9
8.2 Coating designation.....	9
8.3 Coating mass.....	9
8.4 Coating finish condition.....	9
8.5 Surface treatment.....	9
8.6 Base-metal quality.....	10
8.7 Examples.....	10
<b>9 Retests</b> .....	<b>10</b>
9.1 Machining and flaws.....	10
9.2 Elongation.....	10
9.3 Additional tests.....	11
<b>10 Resubmission</b> .....	<b>11</b>

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see [www.iso.org/patents](http://www.iso.org/patents)).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html).

This document was prepared by Technical Committee ISO/TC 17, *Steel*, Subcommittee SC 12, *Continuous mill flat rolled products*.

This fifth edition cancels and replaces the fourth edition (ISO 5000:2011), which has been technically revised. The main changes compared to the previous edition are as follows:

— editorial updates throughout for clarity.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at [www.iso.org/members.html](http://www.iso.org/members.html).
