Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Equipment design	3
4.1 LNG tank wagon.....	3
4.2 LNG tank container.....	3
4.3 Tanks for LNG tank wagons and tank containers.....	3
4.4 Loading or unloading bay configuration.....	6
4.5 Connection couplings.....	8
4.5.1 Type and size of connections.....	8
4.5.2 Quick connect disconnect coupler (QCDC).....	8
4.5.3 Emergency release coupling (ERC).....	8
4.6 LNG transfer hoses or arms.....	8
4.7 General process design requirements.....	9
4.7.1 General.....	9
4.7.2 Overfill detection and overpressurization.....	9
4.7.3 Loading and unloading process.....	10
4.7.4 Quantity and quality measurement.....	10
4.7.5 Sampling.....	11
4.7.6 Predicting LNG quality change due to ageing.....	11
5 Leak and fire management	11
5.1 Leak avoidance, detection and management.....	11
5.1.1 General.....	11
5.1.2 Avoidance.....	11
5.1.3 Gas detection.....	12
5.1.4 Management.....	12
5.2 Fire avoidance, detection and management strategies.....	13
5.2.1 Fire avoidance.....	13
5.2.2 Fire detection.....	13
5.2.3 Fire management.....	13
6 Layout considerations	13
6.1 Safety separation distances.....	13
6.2 Typical equipment layout.....	13
6.3 Buildings.....	13
7 Commissioning and start-up	14
8 Operations	15
8.1 Initial checks.....	15
8.2 Weighing before loading or unloading operation.....	15
8.3 Loading terminal.....	16
9 Stakeholder analysis	16
Bibliography	18

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 67, *Oil and gas industries including lower carbon energy*, Subcommittee SC 9, *Production, transport and storage facilities for cryogenic liquefied gases*, in collaboration with the European Committee for Standardization (CEN) Technical Committee CEN/TC 282, *Installation and equipment for LNG*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
