<b>Foreword</b> .....	<b>v</b>
<b>1 Scope</b> .....	<b>1</b>
<b>2 Normative references</b> .....	<b>1</b>
<b>3 Terms and definitions</b> .....	<b>1</b>
<b>4 Location of refrigerating equipment</b> .....	<b>1</b>
4.1 General.....	1
4.2 Refrigerating equipment located in the open air.....	2
4.3 Refrigerating equipment located in a machinery room.....	2
4.4 Refrigerating equipment located in the occupied space.....	2
4.5 Refrigerating equipment located in unoccupied areas not designated a machinery room.....	2
4.6 Refrigerating equipment located in a ventilated enclosure within an occupied space.....	2
4.7 Piping duct or shaft.....	2
<b>5 Machinery rooms</b> .....	<b>2</b>
5.1 Occupancy of machinery rooms and special machinery rooms.....	2
5.2 Venting from or through the machinery room.....	3
5.3 Combustion equipment and air compressors.....	3
5.4 Open flame.....	3
5.5 Storage.....	3
5.6 Remote emergency switch.....	3
5.7 Exterior openings of the machinery room.....	3
5.8 Piping and ducting.....	4
5.9 Normal lighting.....	4
5.10 Emergency lighting.....	4
5.11 Dimensions and accessibility.....	4
5.12 Doors, walls, and ducts.....	4
5.13 Ventilation.....	5
5.14 Machinery rooms for flammable refrigerants (groups A2L, A2, B2L, B2, B3, and A3).....	6
<b>6 Requirements for alternative provisions</b> .....	<b>7</b>
6.1 General.....	7
6.2 Occupied space.....	7
6.3 Ventilation.....	7
6.4 Safety shut-off valves.....	9
<b>7 Electrical installations</b> .....	<b>9</b>
7.1 General requirements.....	9
7.2 Main power supply.....	10
7.3 Electrical equipment in machinery rooms in which a refrigerating system contains class 2L flammability refrigerants.....	10
<b>8 Safety alarms</b> .....	<b>10</b>
8.1 General.....	10
8.2 Alarm system power.....	10
8.3 Alarm system warning.....	10
8.4 Additional alarm system requirements for R-717 systems with charges above 4 500 kg.....	11
<b>9 Detectors</b> .....	<b>11</b>
9.1 General.....	11
9.2 Location of detectors.....	11
9.3 Function of the detector.....	11
9.4 Type and performance of a detector.....	11
9.5 Installation.....	12
<b>10 Instruction manuals, notices, and inspections</b> .....	<b>12</b>
10.1 Instruction manual.....	12
10.2 Warning notice.....	12

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see [www.iso.org/patents](http://www.iso.org/patents)).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the WTO principles in the Technical Barriers to Trade (TBT) see the following URL: [Foreword - Supplementary information](#)

The committee responsible for this document is ISO/TC 86, *Refrigeration and air-conditioning*, Subcommittee SC 1, *Safety and environmental requirements for refrigerating systems*.

ISO 5149-3, together with ISO 5149-1, ISO 5149-2, and ISO 5149-4, cancels and replaces ISO 5149:1993, which has been technically revised.

ISO 5149 consists of the following parts, under the general title *Refrigerating systems and heat pumps — Safety and environmental requirements*:

- *Part 1: Definitions, classification and selection criteria*
- *Part 2: Design, construction, testing, marking and documentation*
- *Part 3: Installation site*
- *Part 4: Operation, maintenance, repair and recovery*
