# Heat recovery ventilators and energy recovery ventilators — Testing and calculating methods for seasonal performance factor —

Part 1:

## Sensible heating recovery seasonal performance factors of heat recovery ventilators (HRV)

*Ventilateurs récupérateurs de chaleur et ventilateurs récupérateurs d'énergie — Méthodes d'essai et de calcul des facteurs de performances saisonnières —*

*Partie 1: Facteurs de performances saisonnières de la récupération de chaleur sensible des ventilateurs récupérateurs de chaleur (HRV)*

Foreword.....	iv
<b>1 Scope</b> .....	<b>1</b>
<b>2 Normative references</b> .....	<b>1</b>
<b>3 Terms and definitions</b> .....	<b>1</b>
<b>4 Symbols and abbreviated terms</b> .....	<b>2</b>
<b>5 Tests</b> .....	<b>3</b>
5.1 General requirements.....	3
5.2 Test conditions.....	3
5.3 Test methods.....	3
5.3.1 General.....	3
5.3.2 Energy saving stage limit temperature.....	4
5.3.3 Sensible heating recovery performance test.....	4
5.3.4 Determination of bypass outdoor temperature.....	4
5.3.5 Measurement of power input of heat recovery ventilator with bypass ventilation function.....	4
5.3.6 Determination of the frosting temperature by test.....	5
<b>6 Calculations</b> .....	<b>6</b>
6.1 Gross sensible heating recovery effectiveness ( $\epsilon_{sh}$ ).....	6
6.2 Sensible heating coefficient of energy.....	6
6.2.1 Sensible heating coefficient of energy: ducted ventilators.....	6
6.2.2 Sensible heating coefficient of energy: unducted ventilators.....	7
6.3 Calculation of seasonal performance factor of sensible heating recovery ( $F_{sh}$ ).....	7
6.3.1 Reference outdoor air heating load and sensible heating recovery capacity.....	7
6.3.2 The characteristics of sensible heating recovery capacity against outdoor temperature.....	8
6.3.3 Power input characteristics of sensible heating recovery against outdoor temperature.....	9
6.3.4 Outdoor temperature bin distribution for heating.....	10
6.3.5 Calculation of seasonal sensible heating recovery capacity ( $E_{sh}$ ).....	10
6.3.6 Calculation of seasonal sensible heating recovery power input ( $P_{in,E}$ ).....	10
6.3.7 Calculation of seasonal performance factor for sensible heating recovery ( $F_{sh}$ ).....	11
<b>7 Test report</b> .....	<b>11</b>
<b>Annex A (informative) The schematic diagram of HRV heating (H) operation</b> .....	<b>12</b>
<b>Annex B (informative) The default outdoor temperature bin distribution for heating</b> .....	<b>14</b>
<b>Annex C (normative) Method of determination of the temperature <math>T_{F,0}</math></b> .....	<b>15</b>
<b>Annex D (informative) Calculating method for seasonal performance factor when setting a specific application heating load</b> .....	<b>16</b>
<b>Annex E (normative) Calculation of the bypass outdoor temperature</b> .....	<b>18</b>
<b>Annex F (informative) Report template</b> .....	<b>19</b>
<b>Bibliography</b> .....	<b>22</b>

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see [www.iso.org/patents](http://www.iso.org/patents)).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html).

This document was prepared by Technical Committee ISO/TC 86, *Refrigeration and air-conditioning, Subcommittee SC 6, Testing and rating of air-conditioners and heat pumps*.

A list of all parts in the ISO 5222 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at [www.iso.org/members.html](http://www.iso.org/members.html).
