

ISO 5222-2

**Heat recovery ventilators and
energy recovery ventilators —
Testing and calculating methods for
seasonal performance factor —**

**Part 2:
Sensible cooling recovery seasonal
performance factors of heat
recovery ventilators (HRV)**

*Ventilateurs récupérateurs de chaleur et ventilateurs
récupérateurs d'énergie — Méthodes d'essai et de calcul des
facteurs de performances saisonnières —*

*Partie 2: Facteurs de performances saisonnières de la
récupération de froid sensible des ventilateurs récupérateurs de
chaleur (HRV)*

**First edition
2025-02**

Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Symbols and abbreviated terms	2
5 Tests	3
5.1 General requirements.....	3
5.2 Test conditions.....	3
5.3 Test methods.....	4
5.3.1 General.....	4
5.3.2 Energy saving stage limit temperature.....	4
5.3.3 Sensible cooling recovery performance test.....	4
5.3.4 The determination of bypass outdoor temperature.....	4
5.3.5 Measurement of power input of heat recovery ventilator with bypass ventilation function.....	4
5.3.6 Measurement of power input of heat recovery ventilator with no bypass ventilation function.....	5
6 Calculations	5
6.1 Gross sensible cooling recovery effectiveness (ϵ_{sc}).....	5
6.2 Calculation of seasonal performance factor of sensible cooling recovery (F_{sc}).....	5
6.2.1 Reference outdoor air cooling load and sensible cooling recovery capacity.....	5
6.2.2 The characteristics of sensible cooling recovery capacity against outdoor temperature.....	6
6.2.3 Power input characteristics of sensible cooling recovery against outdoor temperature.....	7
6.2.4 Outdoor temperature bin distribution for cooling.....	7
6.2.5 Calculation of seasonal sensible cooling recovery capacity (E_{sc}).....	7
6.2.6 Calculation of seasonal sensible cooling recovery power input ($P_{in,E}$).....	8
6.2.7 Calculation of seasonal performance factor for sensible cooling recovery (F_{sc}).....	8
7 Test report	8
Annex A (Informative) The schematic diagram of HRVs cooling (C) operation	10
Annex B (informative) The default outdoor temperature bin distribution for cooling	12
Annex C (informative) Calculating method for seasonal performance factor when setting a specific application cooling load	13
Annex D (normative) The calculation of bypass outdoor temperature	15
Annex E (informative) Report template	16
Bibliography	18

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 86, *Refrigeration and air-conditioning*, SC 6, *Testing and rating of air-conditioners and heat pumps*.

A list of all parts in the ISO 5222 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
