## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 5413 was prepared by Technical Committee ISO/TC 29, *Small tools*, Sub-Committee SC 7, *Milling cutters and milling machine accessories*.

This second edition cancels and replaces the first edition (ISO 5413:1976), in which the dimensions dealt with in ISO 296 have been deleted and the tolerances for  $b$  and  $b_1$  have been modified.

# Machine tools — Positive drive of Morse tapers

## 1 Scope

This International Standard specifies dimensions for positive drive of external and internal Morse tapers.

The Morse tapers are in accordance with ISO 296.

## 2 Normative reference

The following standard contains provisions which, through reference in this text, constitute provisions of this International Standard. At the time of publication, the edition indicated was valid. All standards are subject to revision, and parties to agreements based on this International Standard are encouraged to investigate the possibility of applying the most recent edition of the standard indicated below. Members of IEC and ISO maintain registers of currently valid International Standards.

ISO 296:1991, *Machine tools — Self-holding tapers for tool shanks.*

## 3 Dimensions

See figure 1 and table 1.
