

ISO 5667-4

Water quality — Sampling —

Part 4:
**Guidance on sampling from lakes,
natural and man-made**

Qualité de l'eau — Échantillonnage —

Partie 4: Lignes directrices pour l'échantillonnage des eaux des lacs naturels et des lacs artificiels

**Third edition
2026-02**

Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Sampling equipment	3
4.1 Material selection.....	3
4.2 Cleaning.....	3
4.3 Maintenance.....	3
5 Design of the sampling programme	3
6 Sampling procedure	4
6.1 General.....	4
6.2 Sampling location.....	4
6.2.1 General.....	4
6.2.2 Horizontal distribution of sampling positions.....	4
6.2.3 Vertical distribution of sampling points.....	5
6.3 Frequency and timing of sampling.....	5
6.4 Choice of sampling method.....	5
6.5 Choice of the sampling device.....	6
6.6 Aids for recovery of lost sampling equipment.....	6
6.7 Blank sample.....	6
6.8 Transport, stabilization and keeping of samples.....	6
7 Occupational health and safety	6
8 Sample containers	7
9 Priority of procedure	7
10 Sample collection, contamination with environmental materials	8
11 Rinsing the sampling equipment	9
12 Sampling surface or near-surface water with an open sampling device	9
12.1 General.....	9
12.2 Sampling.....	9
12.3 Filling multiple containers.....	9
13 Sampling with closed samplers	10
14 Sampling for volatile parameters	10
15 Sampling through ice	10
16 Severe freezing conditions	10
17 Sample identification and records	11
18 Quality assurance and quality control	11
18.1 General.....	11
18.2 Avoidance of contamination.....	11
Annex A (informative) Examples of sampling devices	14
Annex B (informative) Advantages and disadvantages of sampling equipment	26
Annex C (informative) Sampling from boats — Maintaining station	27
Annex D (informative) Example of a report — Sampling from lakes, natural and man-made	29
Annex E (informative) Continuous measurement of water samples with immersion probes	30
Bibliography	32

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 147, *Water quality*, Subcommittee SC 6, *Sampling (general methods)*.

This third edition cancels and replaces the second edition (ISO 5667-4:2016), of which it constitutes a minor revision.

The change is as follows: the following sentence has been added to the scope: "For specific guidance on the sampling for microplastics, see ISO 5667-27".

A list of all parts in the ISO 5667 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
