Contents

	Page
1 Scope	1
2 Term and definition	1
3 Liquid component	1
4 Powder component	2
5 Liquid-powder mixture intended for syringe usage	2
6 Liquid-powder mixture intended for use in dough state	2
7 Set and polymerized cement	3
8 Packaging	3
9 Labelling	3

Annexes

A Determination of stability of liquid component	5
B Determination of doughing time of liquid-powder mixture of cement intended for dough usage	7
C Determination of maximum temperature and setting time of liquid-powder mixture	9
D Determination of intrusion of liquid-powder mixture of cement intended for dough usage	13
E Determination of compressive strength of polymerized cement	15
F Determination of bending modulus and bending strength of polymerized cement.....	19

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 3.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this International Standard may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

International Standard ISO 5833 was prepared by Technical Committee ISO/TC 150, *Implants for surgery*, Subcommittee SC 1, *Materials*.

This second edition cancels and replaces the first edition (ISO 5833:1992), which has been technically revised.

Annexes A, B, C, D, E and F form a normative part of this International Standard.
