Third edition
2013-09-01

Flexible cellular polymeric materials — Polyurethane foam for load-bearing applications excluding carpet underlay — Specification

*Matériaux polymères alvéolaires souples — Mousse de polyuréthane
pour utilisations soumises à des charges, à l'exclusion des revers de
tapis — Spécifications*

Foreword	iv
1 Scope	1
2 Normative references	1
3 Classification	2
3.1 Type	2
3.2 Class	2
3.3 Grade	5
4 Requirements	5
4.1 Material	5
4.2 Construction	6
4.3 Surface condition	6
4.4 Odour	6
4.5 Colour	6
4.6 Component mass and density	6
4.7 Dimensions	6
4.8 Physical properties	7
4.9 Burning properties	10
5 Test methods	10
5.1 Test conditions	10
5.2 Mass	11
5.3 Dimensions	11
5.4 Density	11
5.5 Hardness	11
5.6 Resilience	11
5.7 Compression set	11
5.8 Dynamic fatigue by constant-load pounding	11
5.9 Tensile strength and elongation at break	11
5.10 Burning behaviour	11
5.11 Heat ageing	11
5.12 Humidity ageing	11
6 Inspection	12
6.1 General	12
6.2 Type inspection	12
6.3 Shipping inspection	12
7 Marking	12
Annex A (informative) Typical applications for each class of material	14
Annex B (informative) Burning properties of flexible polyurethane foam and recommendations regarding its use	15
Bibliography	17

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2. www.iso.org/directives

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received. www.iso.org/patents

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

The committee responsible for this document is ISO/TC 45, *Rubber and rubber products*, Subcommittee SC 4, *Products (other than hoses)*.

This third edition cancels and replaces the second edition (ISO 5999:2007), which has been technically revised.
