ISO 609

**Coal and coke — Determination
of carbon and hydrogen — High
temperature combustion method**

*Charbon et coke — Dosage du carbone et de l'hydrogène —
Méthode par combustion à haute température*

**Third edition
2025-05**

Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Principle	1
5 Reagents and materials	2
6 Apparatus	2
7 Preparation of the apparatus	7
7.1 Preparation of the combustion tube.....	7
7.2 Location of the silver gauze roll.....	7
7.3 Conditioning the absorption train.....	8
8 Preparation of test sample	9
9 Procedure	9
9.1 Initial operations.....	9
9.2 Combustion of the test portion.....	9
9.3 Completion.....	9
10 Blank test	10
11 Expression of results	10
11.1 Total carbon.....	10
11.2 Organic carbon.....	11
11.3 Total hydrogen.....	11
11.4 Total hydrogen mass fraction, less that present as moisture.....	11
11.5 Additional information.....	11
12 Precision	12
12.1 Repeatability limit.....	12
12.2 Reproducibility limit.....	12
13 Test report	12
Annex A (informative) Derivation of factors used in calculations	13
Bibliography	15

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 27, *Coal and coke*, Subcommittee SC 5, *Methods of analysis*.

This third edition cancels and replaces the second edition (ISO 609:1996), which has been technically revised. It also incorporates the Technical Corrigendum ISO 609:1996/Cor. 1:1996.

The main changes are as follows:

- the normative references have been updated;
- [Clause 3](#) has been added and subsequent clauses have been renumbered;
- [Figures 1, 2, 3](#) and [4](#) have been modified to add keys;
- [Clause 9](#) has been revised;
- [Annex A](#) has been revised.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
